🔧 TOOLS:

- [Phillips #1 Screwdriver](#) (1)

Step 1 — Battery

⚠ Turn the power off and disconnect all cables and cords from the laptop.

● Place the computer on its top on a flat surface with the hinges facing away from you.

Step 2

● Slide the battery release latch to the left which is located on the right-hand side of the battery.

Step 3

- Tilt the battery away from you and lift out.

Step 4 — Service Cover

- Using a Phillips #01 screwdriver, remove the Phillips PM2.5×5.5 screw on the service cover.

- ⓘ This screw does not come out of the service cover completely once loosened.
Step 5

- Slide the service cover toward the front of the laptop.

- Lift the service cover to remove it from the laptop.

Step 6 — RAM

- Press down and away from the ram cards on the tabs surrounding the ram cards.

Step 7

- The first ram card will pop up, and now you will slide it out of its slot.

Step 8

- Repeat this process for the second ram card.

To reassemble your device, follow these instructions in reverse order.
