INTRODUCTION

This guide will give a step-by-step process of how to remove used RAM sticks in an HP Pavilion Model H8-1202 and replace them with new RAM sticks. The computer should not be powered and should be unplugged to safely follow this guide.
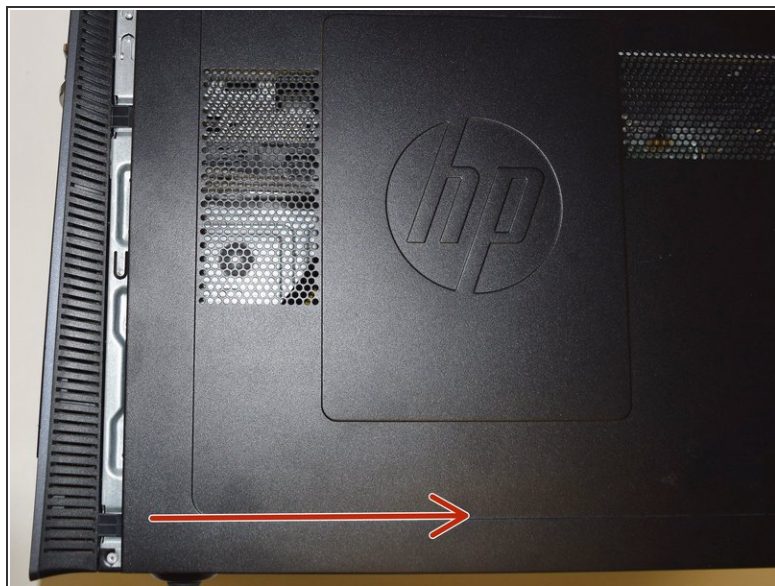

🔧 TOOLS:

- Anti-Static Wrist Strap (1)

This document was generated on 2021-03-02 05:25:30 AM (MST).
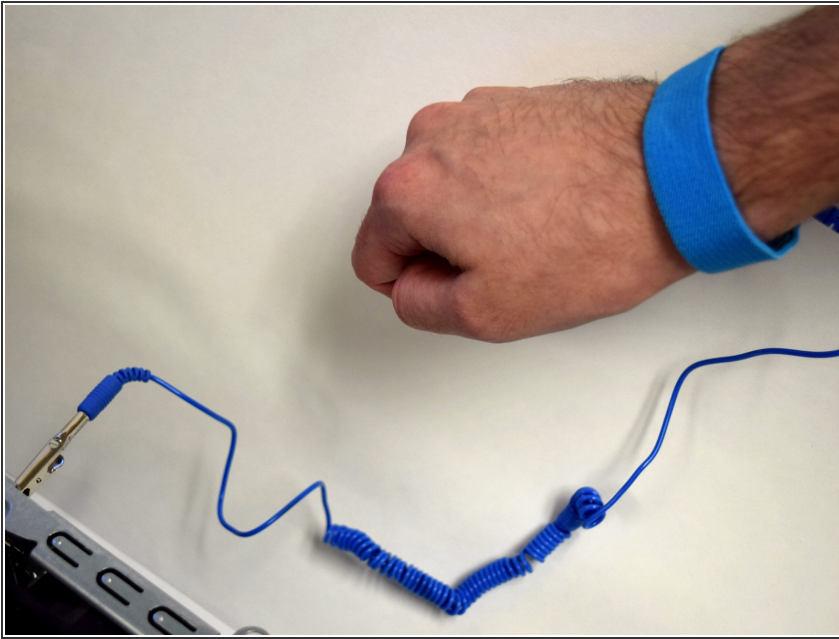

Step 1 — Opening case

- ● Locate thumbscrew on the back of the computer case.

  - (i) The thumbscrew does not require a screwdriver and can be unscrewed by hand.
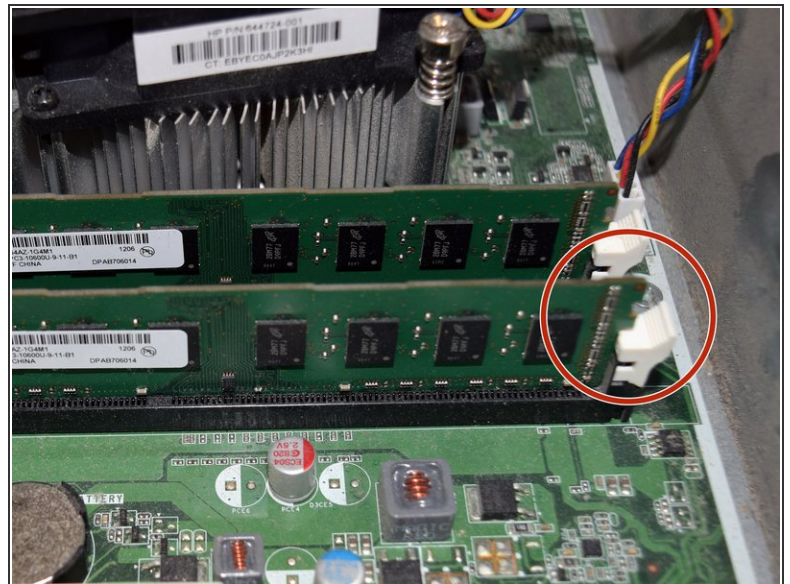

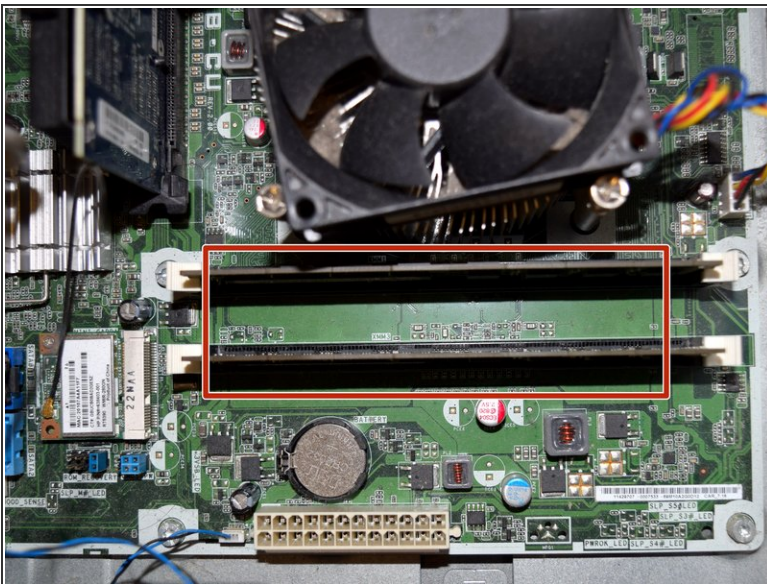

Step 2 — Opening case

- ● Safely place the computer down on its side and slide the panel off the case.

This document was generated on 2021-03-02 05:25:30 AM (MST).
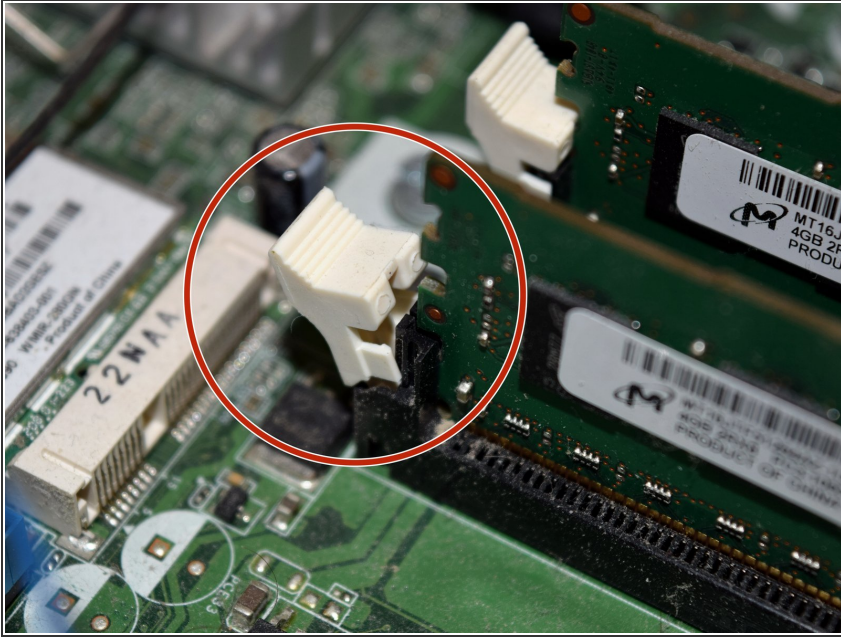

Step 3 — Safety notice

⚠ Due to the potential of painful electric shocks, an anti-static wristband clipped to an unpainted piece of metal on the computer case is highly suggested.

Step 4 — Finding RAM

- Clear aside internal wires and locate RAM sticks secured by clips.

This document was generated on 2021-03-02 05:25:30 AM (MST).

Step 5 — Removing RAM

● Push out securing clips and remove used RAM sticks.

Step 6 — Replacing RAM

● Set aside used RAM sticks and replace them with new RAM sticks. Push clips back in to secure new RAM sticks.

ⓘ RAM sticks should audibly "snap" into place if placed correctly.

To reassemble your device, follow these instructions in reverse order.
