INTRODUCTION

This guide will show you how to replace your trackpad if it is broken or defective.

TOOLS:

Tweezers (1)
Phillips #00 Screwdriver (1)
iFixit Opening Tool (1)
T5 Torx Screwdriver (1)

PARTS:

Lenovo Yoga 710-15IKB Trackpad (1)

Step 1 — Trackpad

- Remove the ten 3.3 mm screws from the base cover using the T5 Torx screwdriver.

Step 2

- Slide opening tool between the base and back cover.

Step 3

- Lift back cover.

Step 4

- Remove the four 3.5 mm screws around the battery using the Phillips 00 screwdriver.

Step 5

- Disconnect the battery from the motherboard.

Step 6

- Lift battery up gently to remove.

Step 7

- Use the JIS 1 screwdriver bit to unscrew the 3 screws.

Step 8

- Grip the tab firmly.

Step 9

- Pull tab until it disconnects from the trackpad. Be gentle - you do not want to damage any part of the tab.

Step 10

- Gently lift the tape with angled tweezers.

Step 11

- Push the trackpad to remove it.

To reassemble your device, follow these instructions in reverse order.
