

# Hoover Power Path Pro Advanced Hose Replacement

This guide will show how to replace the hose on your Hoover Power Path Pro Advanced.

Written By: Jose Andres Gonzalez Valdes

---

## INTRODUCTION

The hose creates a pathway for water to flow from the dirty and clean water tanks on your Hoover Power Path Pro Advanced. However, if there is a puncture in the hose, then it needs to be replaced.

---

### TOOLS:

- [Phillips #2 Screwdriver](#) (1)
-

## Step 1 — Brush Roller

 Unplug the vacuum cleaner from the wall outlet before starting. Make sure the water tanks are empty.

- Lay the cleaner down horizontally with its wheels closest to the floor.

## Step 2

- Hold the lower brush roll with both hands and pull outwards until it is detached.

### Step 3

- Unscrew the 6 marked screws using a Phillips #2 head screwdriver.
- Remove the brush roller.

### Step 4 — Hose

- Use a long #2 Philips head screwdriver to remove the 8 numbered screws on the bottom of the cleaner.
- ⓘ They will also be indicated on the bottom of the vacuum.

## Step 5

- Pull the red handle shown to remove the front suction unit from the cleaner.

## Step 6

- Unscrew the Phillips #2 screw at the bottom of the hose.

## Step 7

- Grab the attachment at tip of the hose and unscrew it. Pull outwards on the hose until completely removed.

To reassemble your device, follow these instructions in reverse order.
