## INTRODUCTION

If you ever find yourself wishing you had more capacity in your laptop's hard drive, replacing your old one with a larger one might be the option for you. This guide will show you how to replace the old hard drive in a Toshiba Satellite with a new one.

---

### TOOLS:

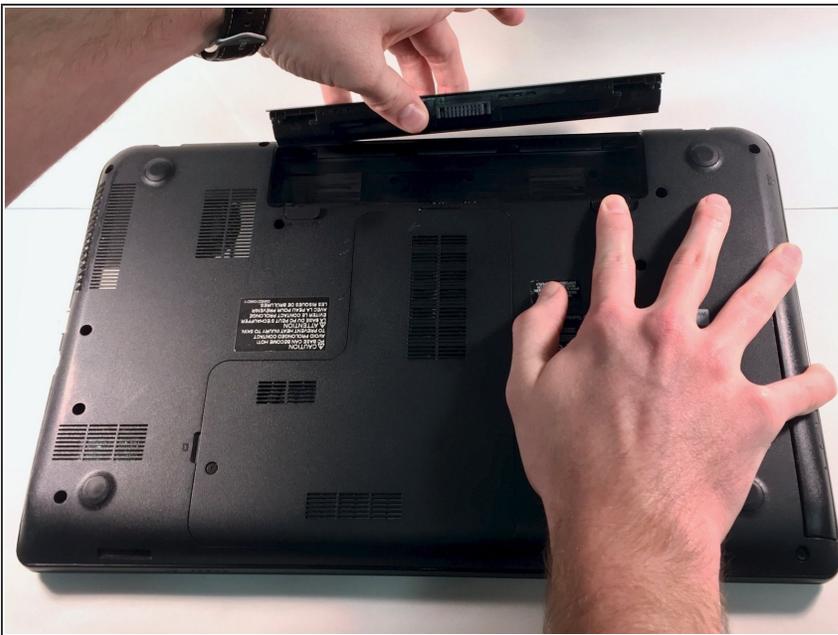

- [Phillips #1 Screwdriver](#) (1)

## Step 1 — Battery

- Press down with your fingers while also applying a sliding motion on the latch buttons near the battery on the underside of your laptop.

## Step 2

- Lift the battery upward with your fingers out of the battery compartment.

### Step 3 — Hard Drive

- Place the laptop with the bottom facing up.
- Remove the single 6mm Phillips #1 screw keeping the laptop panels in place.

### Step 4

- Using the Phillips #1 screwdriver, remove the 8mm screw that is holding the hard drive in place.

## Step 5

- Use your finger to lift the hard drive up.
- Pull out the hard drive to the right.

To reassemble your device, follow these instructions in reverse order.
