

# ZTE Lever Motherboard Replacement

Replacement guide for the motherboard of a ZTE Lever.

Written By: Luke Kilbourne

---

## INTRODUCTION

Follow this guide to perform the replacement of the motherboard on a ZTE Lever smartphone.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Phillips #0 Screwdriver](#) (1)
  - [IFixit Pro Tech Toolkit](#) (1)
-

## Step 1 — Battery

- Remove the SD card and the Sim card from the device.
- ⓘ The Sim and SD cards are not shown here as our device did not come with them.

## Step 2

- Use an iFixit opening tool to separate the back from the device.

## Step 3

- Remove the two 1.6mm Phillips #0 screws from the battery plug cover.
- Remove the cover.

## Step 4

- Disconnect the battery cable from the motherboard with a plastic opening tool.

## Step 5

- Use your hands, or a plastic opening tool, to pry the battery from the phone.

## Step 6 — Volume Buttons

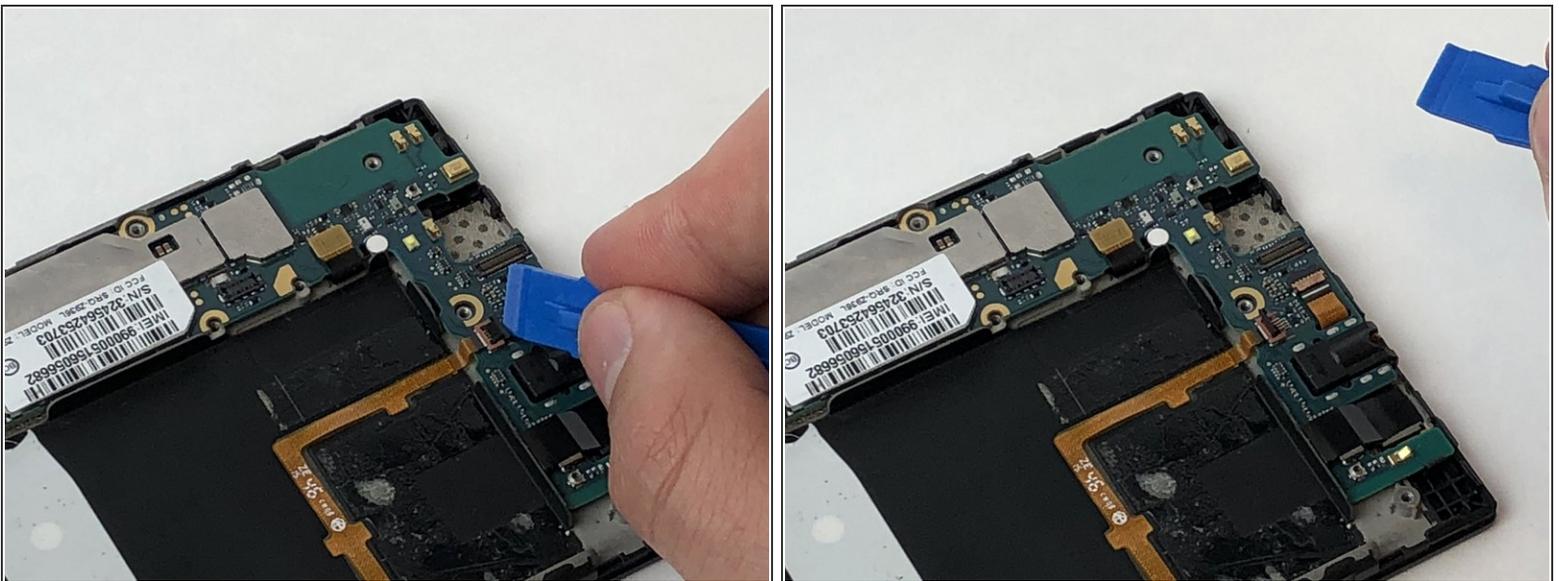

- Remove the three 1.6mm Phillips #0 screws from the plastic cover on the motherboard.

## Step 7

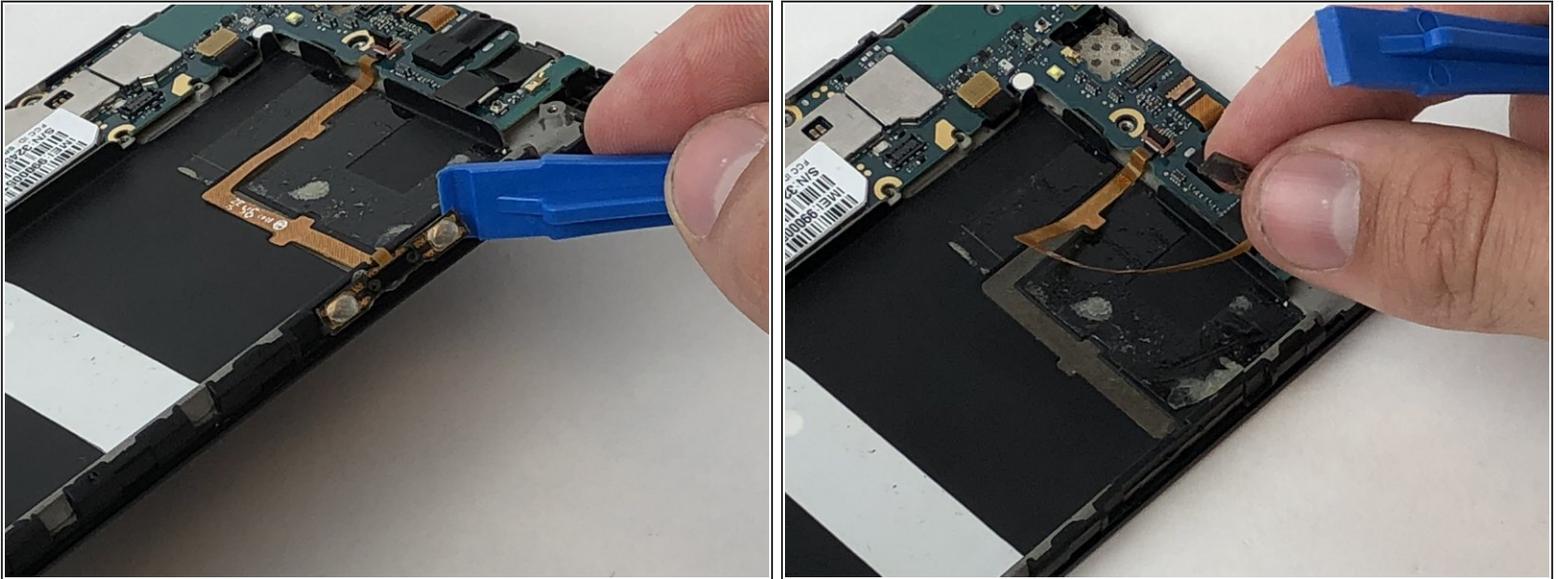

- Remove the top plastic motherboard cover using a plastic opening tool.

## Step 8

- Use a plastic opening tool to flip up the retaining flap on the volume ribbon cable [ZIF](#) socket.

## Step 9

- Peel up the volume button cable from the phone with hands, or plastic opening tool.

## Step 10 — Power Button

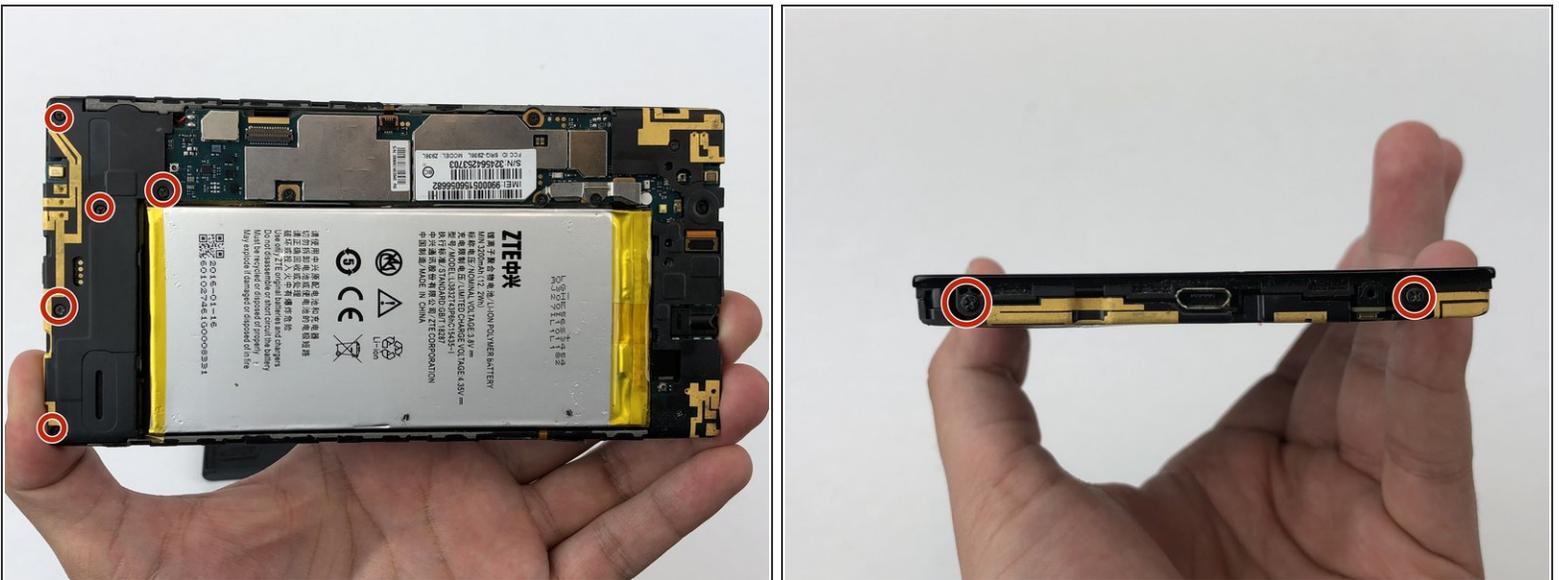

- Disconnect the power button from the motherboard with a plastic opening tool.

## Step 11

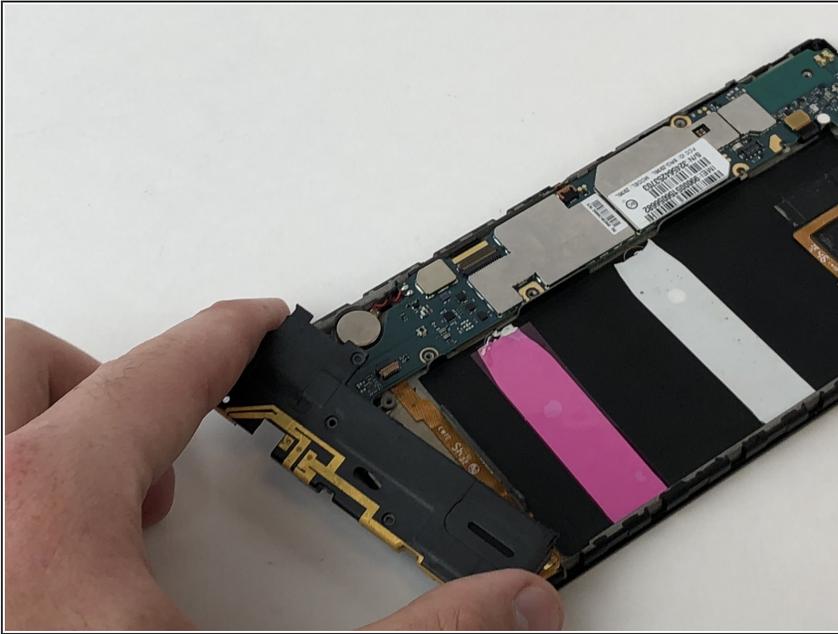

- Peel the power button cable up from the phone with you hands, or a plastic opening tool.

## Step 12 — Motherboard
