INTRODUCTION

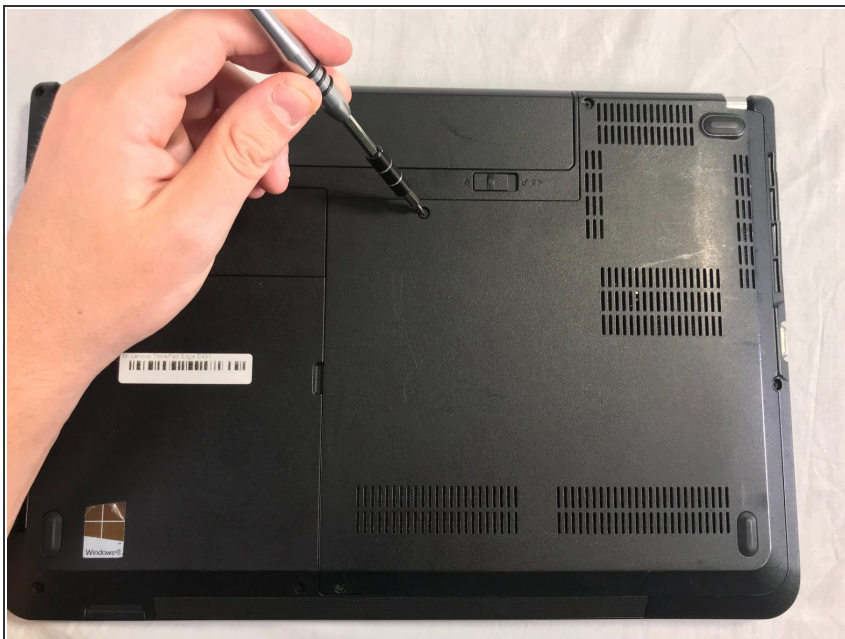

This is a step by step guide on how to remove the fan assembly on the Lenovo Thinkpad Edge E431.

TOOLS:

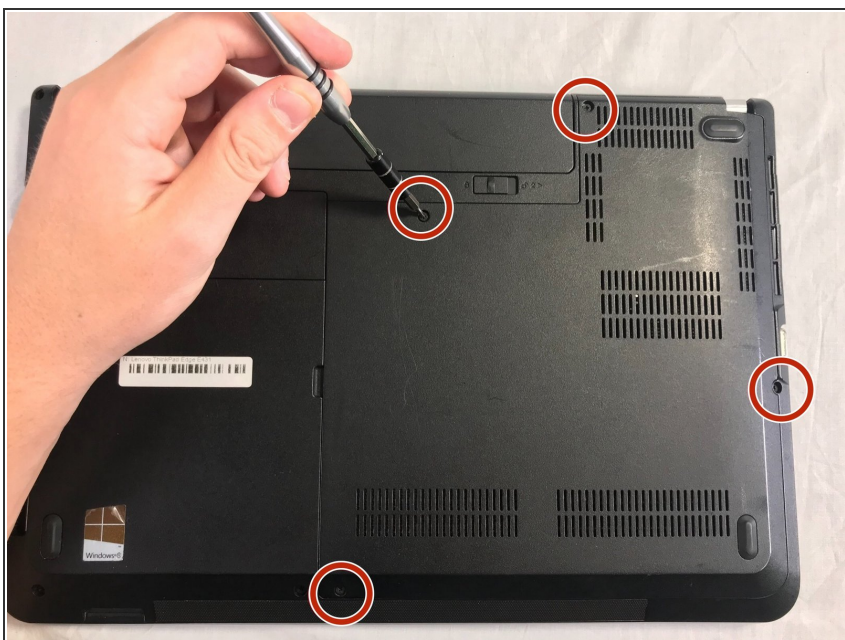

- [Phillips #00 Screwdriver](#) (1)
 - [Tweezers](#) (1)
-

Step 1 — Bottom Panel

- Close the device and remove all power cables.
- Lay the laptop flat with the bottom facing upwards.

Step 2

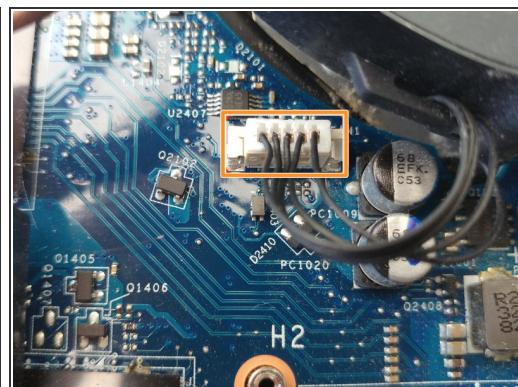

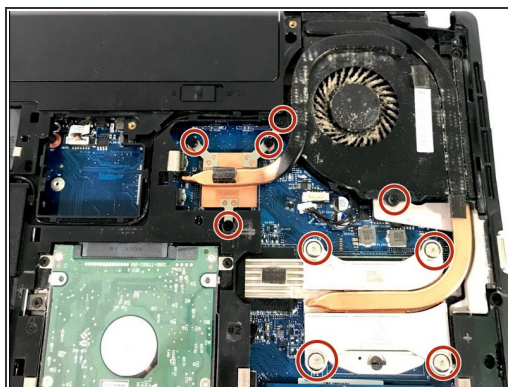

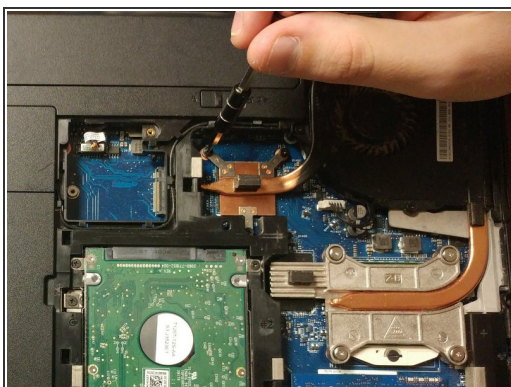

- Remove the four 2mm Phillips #00 screws from the bottom panel.

Step 3

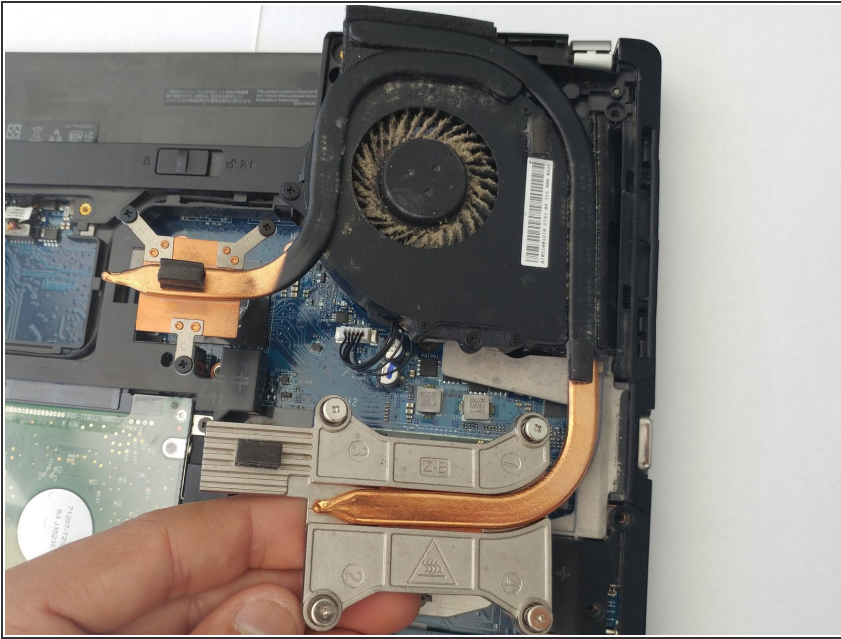

- Remove the back panel of the device.

Step 4 — Cooling Fan

- Remove the nine 2mm Phillips screws from the cooling assembly.
- Using the tweezers, remove the fan power cable from the motherboard.

Step 5

- Lift the fan assembly out of the laptop.

To reassemble your device, follow these instructions in reverse order.
