

Dell Alienware 14 Secondary Hard Drive Replacement

Follow this guide to replace the hard drive for the Dell Alienware 14.

Written By: Terrence15

INTRODUCTION

In this guide, we will show you how to remove and replace the secondary hard drive.

TOOLS:

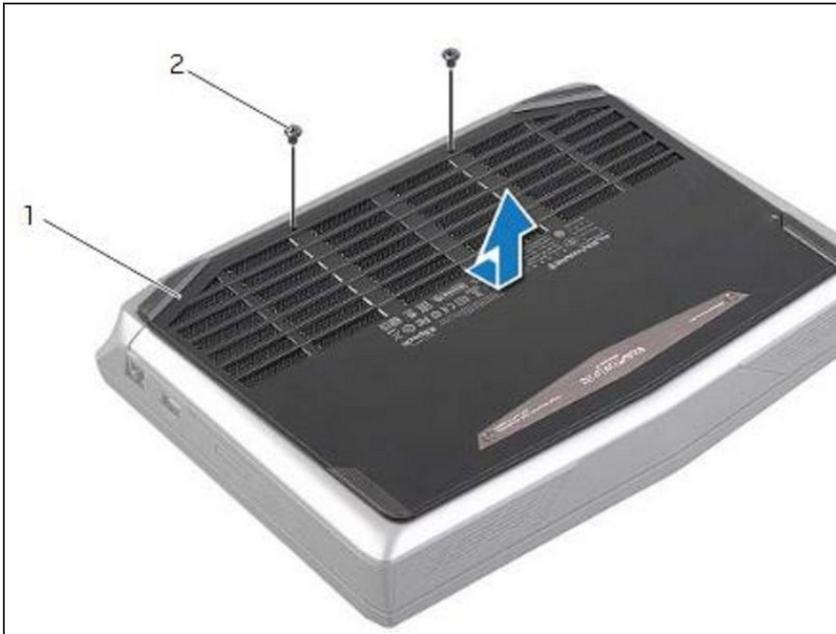

- [Pro Tech Toolkit](#) (1)

PARTS:

- [250 GB SSD](#) (1)
- [500 GB SSD](#) (1)
- [1 TB SSD](#) (1)
- [2 TB SSD](#) (1)

Step 1 — Close the Display

⚠ WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before You Begin](#). After working inside your computer, follow the instructions in ["After Working Inside Your Computer"](#).

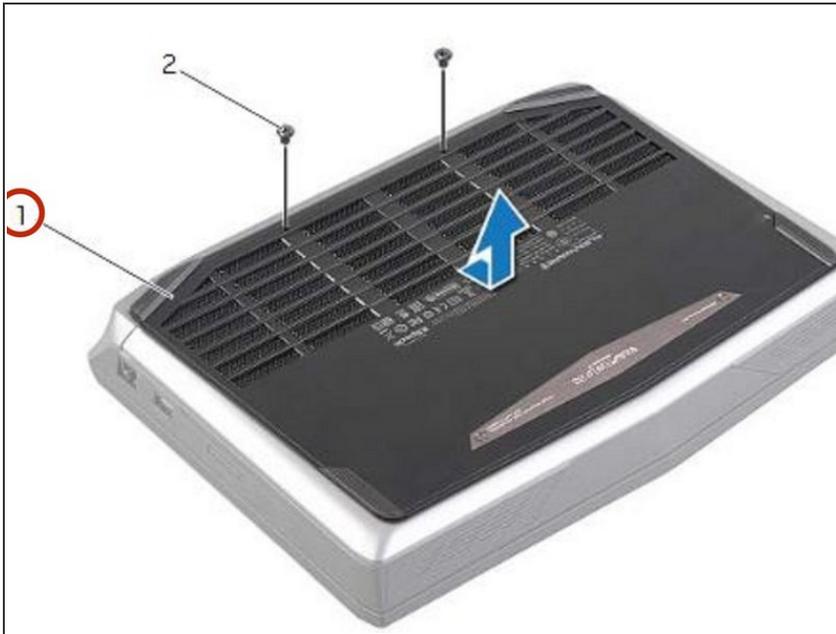

- Close the display, and turn the computer over.

Step 2 — Remove the Screws

- Remove the screws that secure the base cover to the computer base.

Step 3 — Slide and Lift the Base Cover

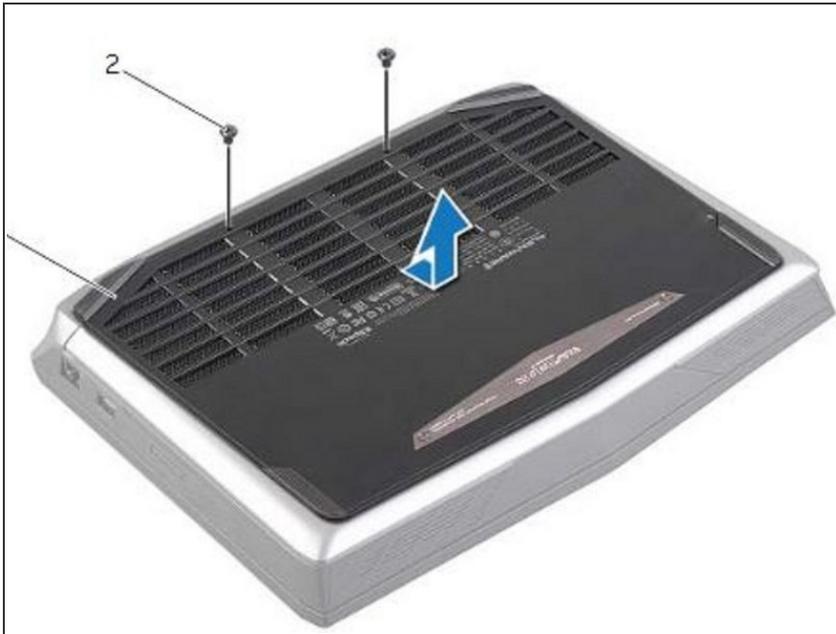

- Slide and lift the base cover off the computer base.

Step 4 — Align the Tabs

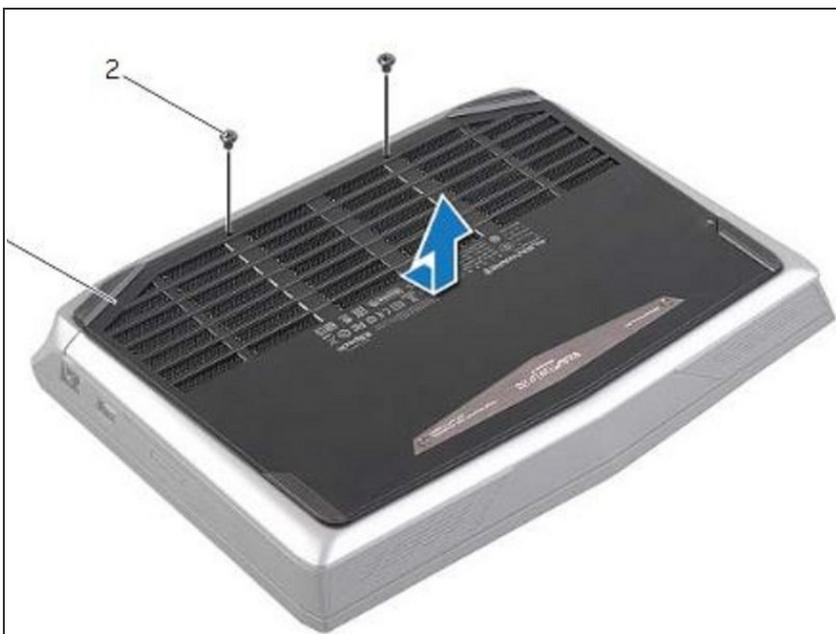

- Align the tabs on the **NEW** base cover with the slots on the computer base and slide the base cover into place.

Step 5 — Replace the Screws

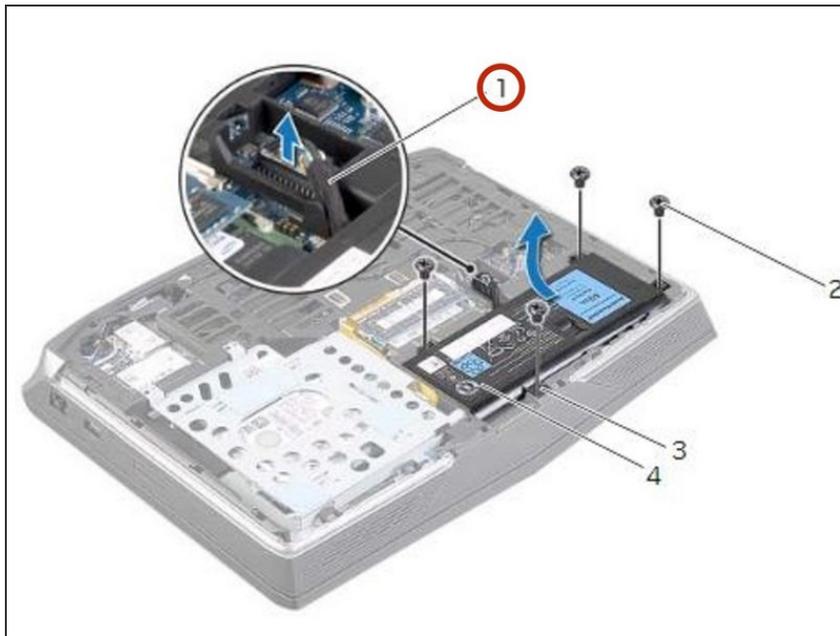

- Replace the screws that secure the base cover to the computer base.

Step 6 — Turn the Computer Over

- Turn the computer over and open the display.

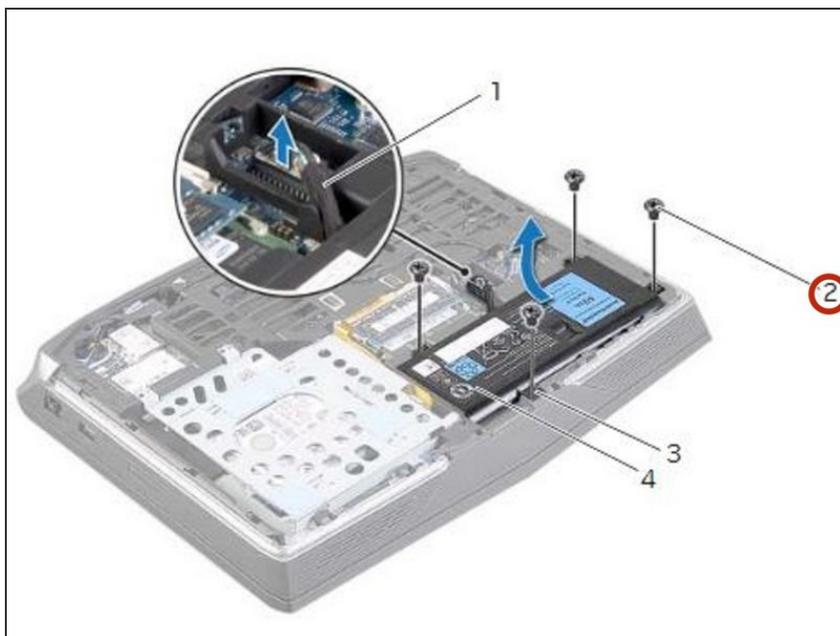

Step 7 — Disconnecting the Battery Cable

⚠ WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before Working Inside Your Computer](#). After working inside your computer, follow the instructions in [After Working Inside Your Computer](#).

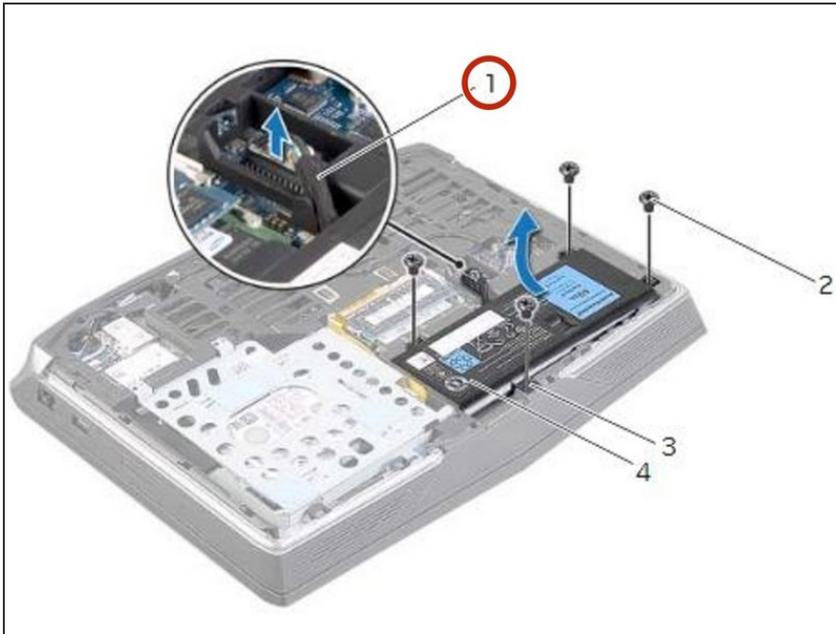

- Disconnect the battery cable from the system-board connector.

Step 8 — Remove the Screws

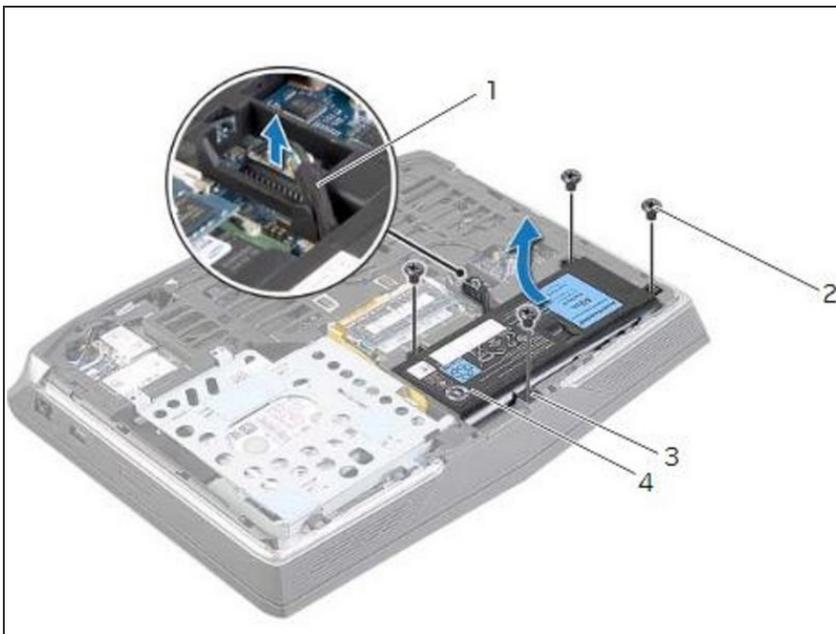

- Remove the screws that secure the battery to the computer base.

Step 9 — Using the Battery Cable

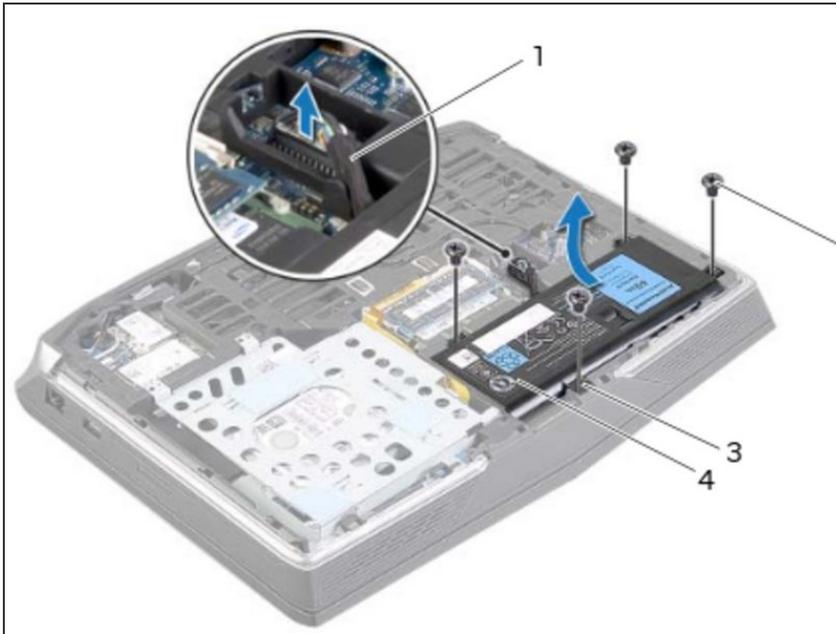

- Using the battery cable, lift the battery and release it from the tabs on the computer base.

Step 10 — Turn the Computer Over

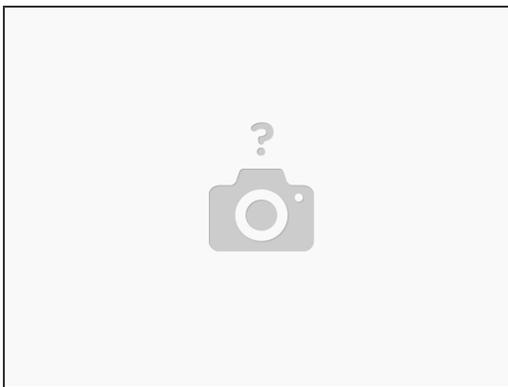

- Turn the computer over and open the display as far as possible.

Step 11 — The Power Button

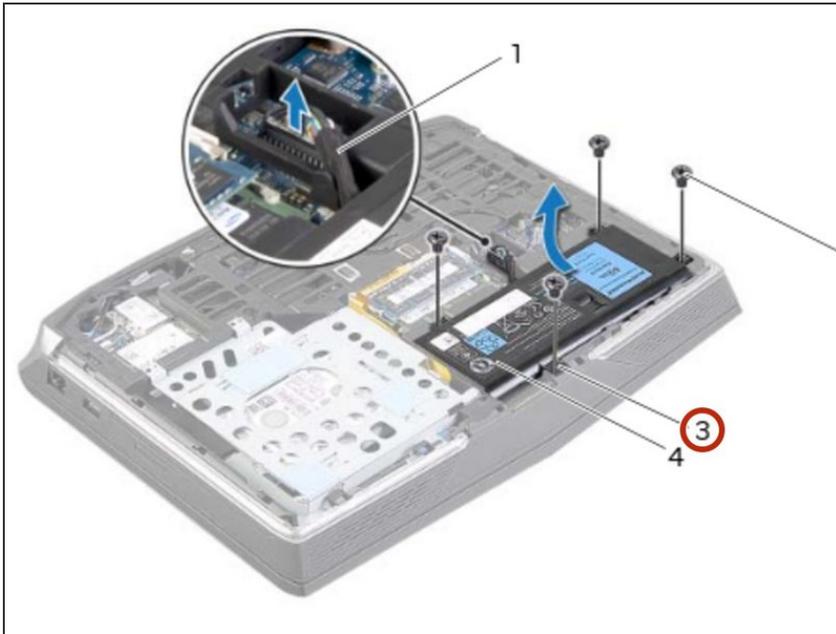

- Press and hold the power button for five seconds to ground the system board.

Step 12 — Close the Display

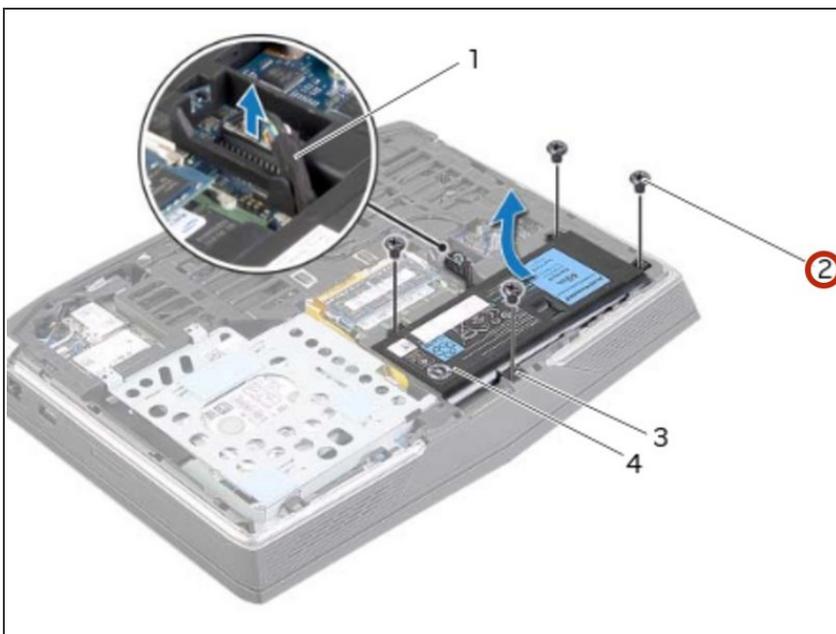

- Close the display and turn the computer over.

Step 13 — Align the Tabs

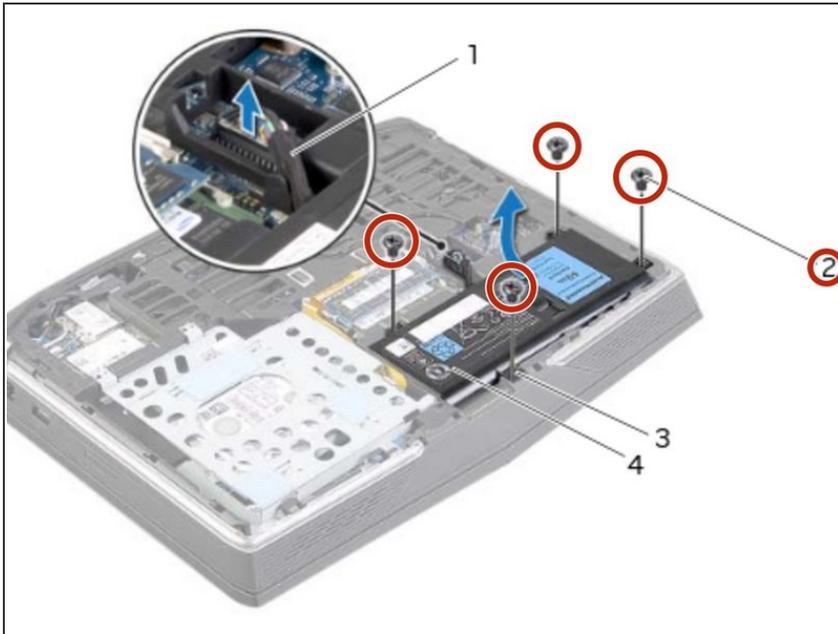

- Align the tabs on the **NEW** battery with the slots on the computer base.

Step 14 — Align the Screw Holes

- Align the screw holes on the battery with the screw holes on the computer base.

Step 15 — Replace the Screws

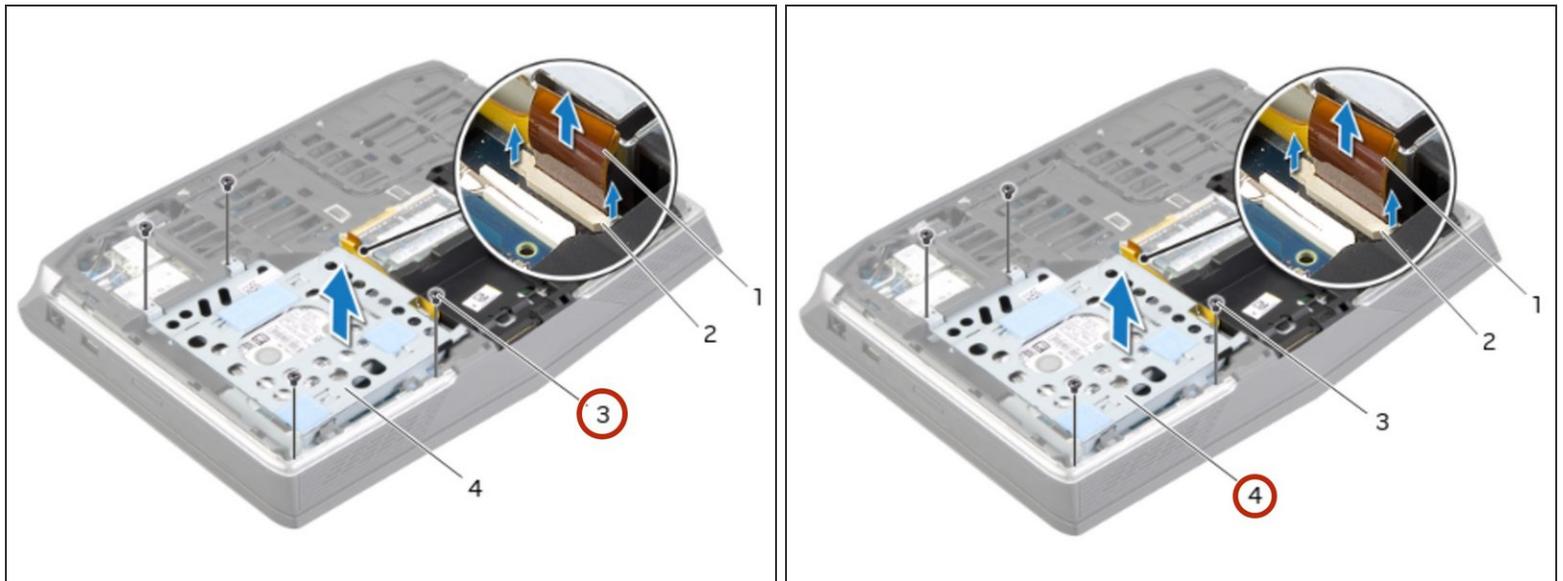

- Replace the screws that secure the battery to the computer base.

Step 16 — Connect the Battery Cable

- Connect the battery cable to the system-board connector.

Step 17 — Remove the Screws

⚠ WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before Working Inside Your Computer](#). After working inside your computer, follow the instructions in [After Working Inside Your Computer](#).

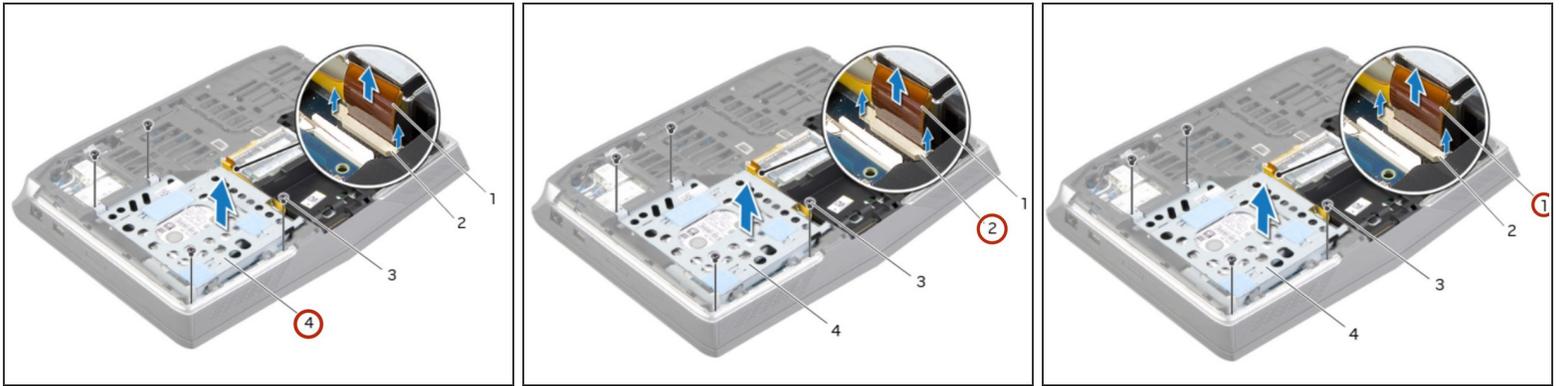

⚠ CAUTION: To avoid data loss, do not remove the hard drive while the computer is On or in Sleep state.

⚠ CAUTION: Hard drives are extremely fragile. Exercise care when handling the hard drive.

ⓘ NOTE: The secondary hard-drive or solid-state drive is optional and can be installed in the optical drive bay.

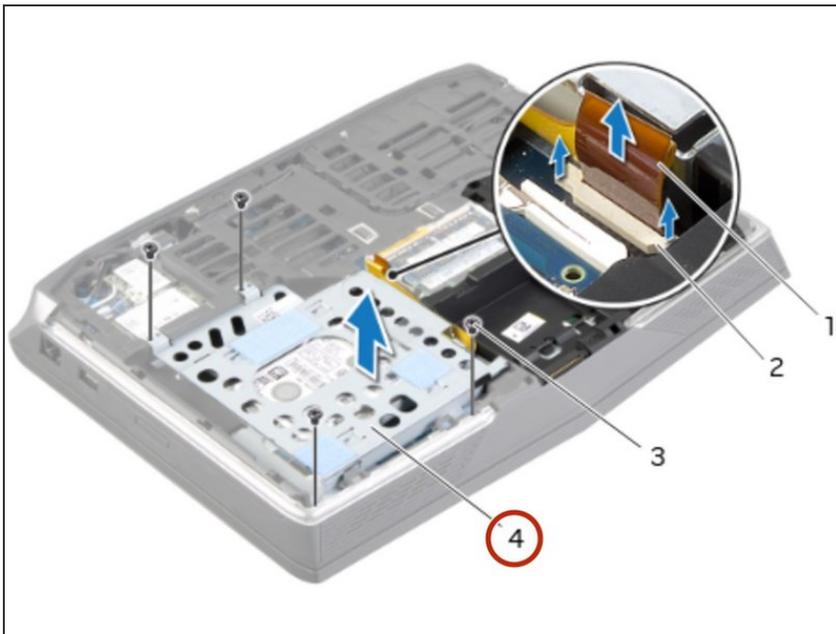

- Remove the screws that secure the secondary hard-drive assembly to the computer base.

Step 18 — Lifting the Secondary Hard-Drive

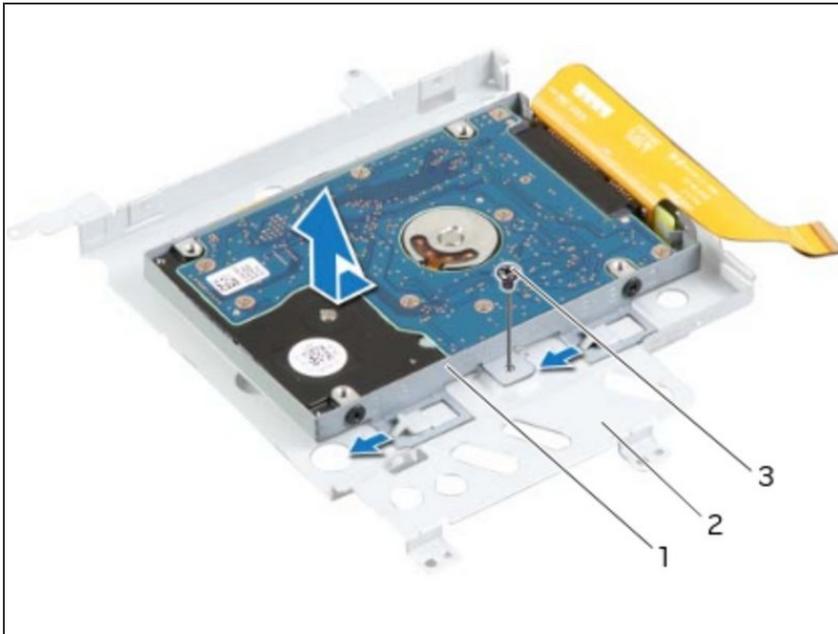

- Carefully lift the secondary hard-drive assembly and then lift the latches to release the secondary hard-drive cable from the system-board connector.

Step 19 — Lifting the Hard Drive

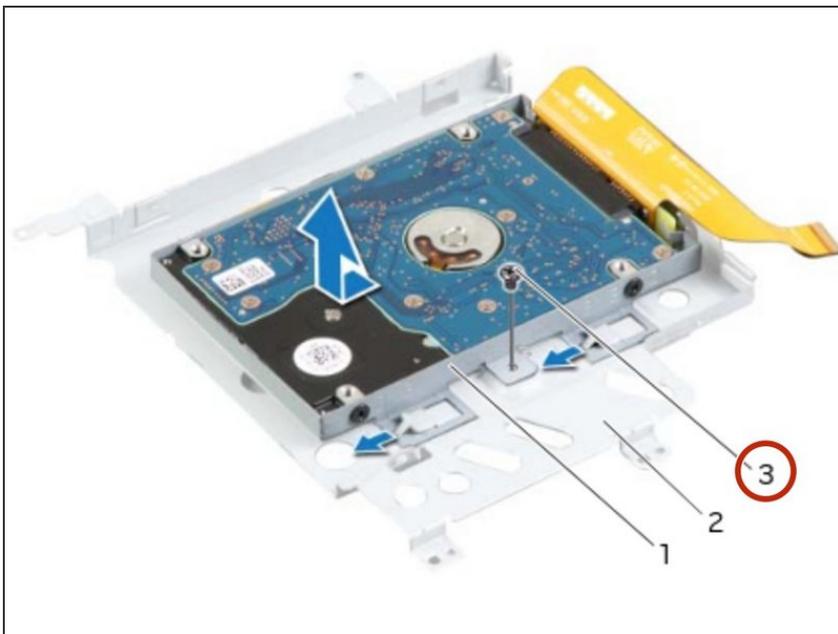

- Lift the secondary hard-drive assembly off the computer base.

Step 20 — Turn the Assembly Over

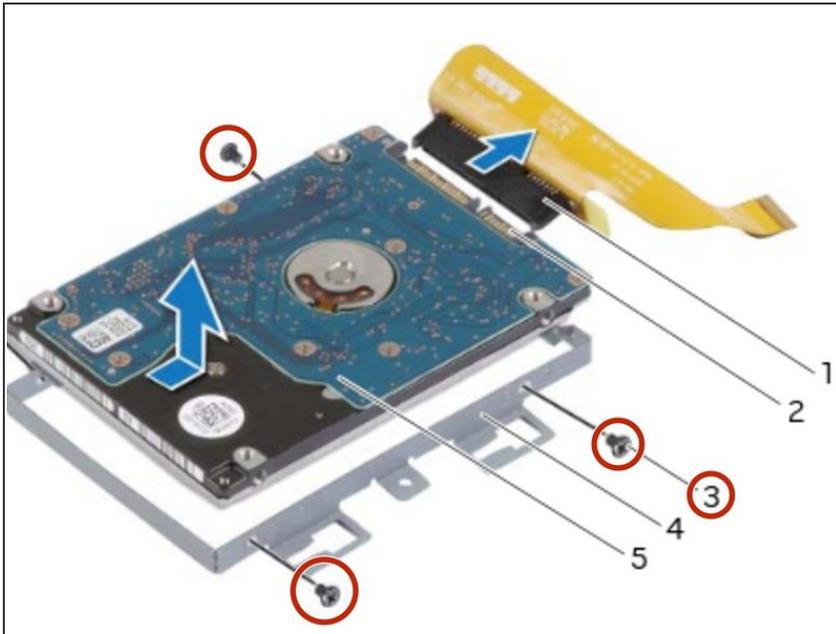

- Turn the secondary hard-drive assembly over.

Step 21 — Remove the Screw

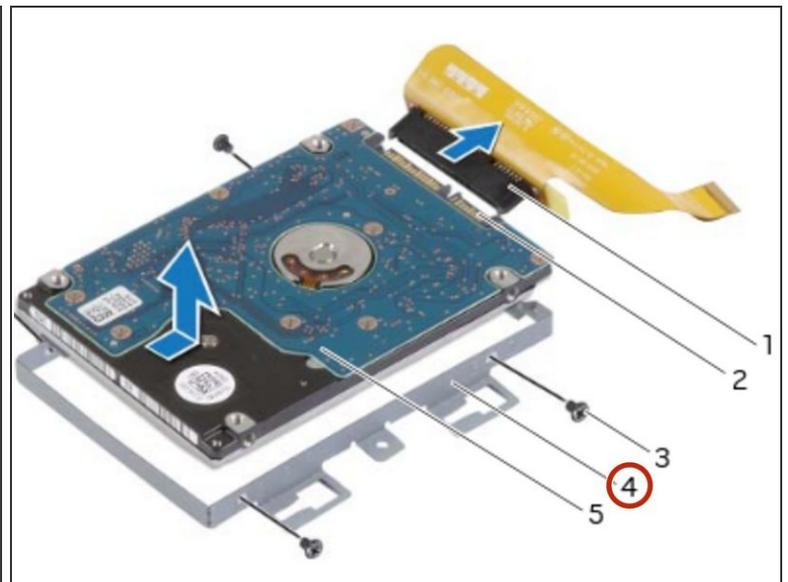

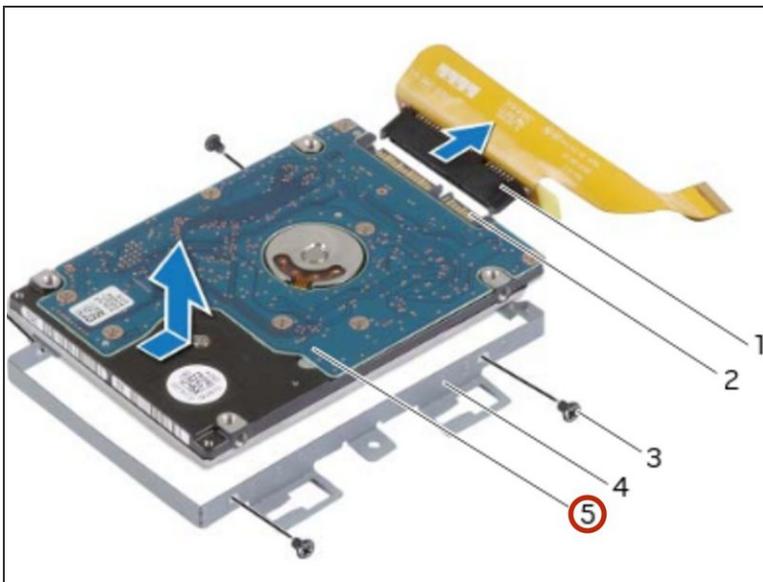

- Remove the screw that secures the secondary hard-drive assembly to the main bracket.

Step 22 — Remove the Screws

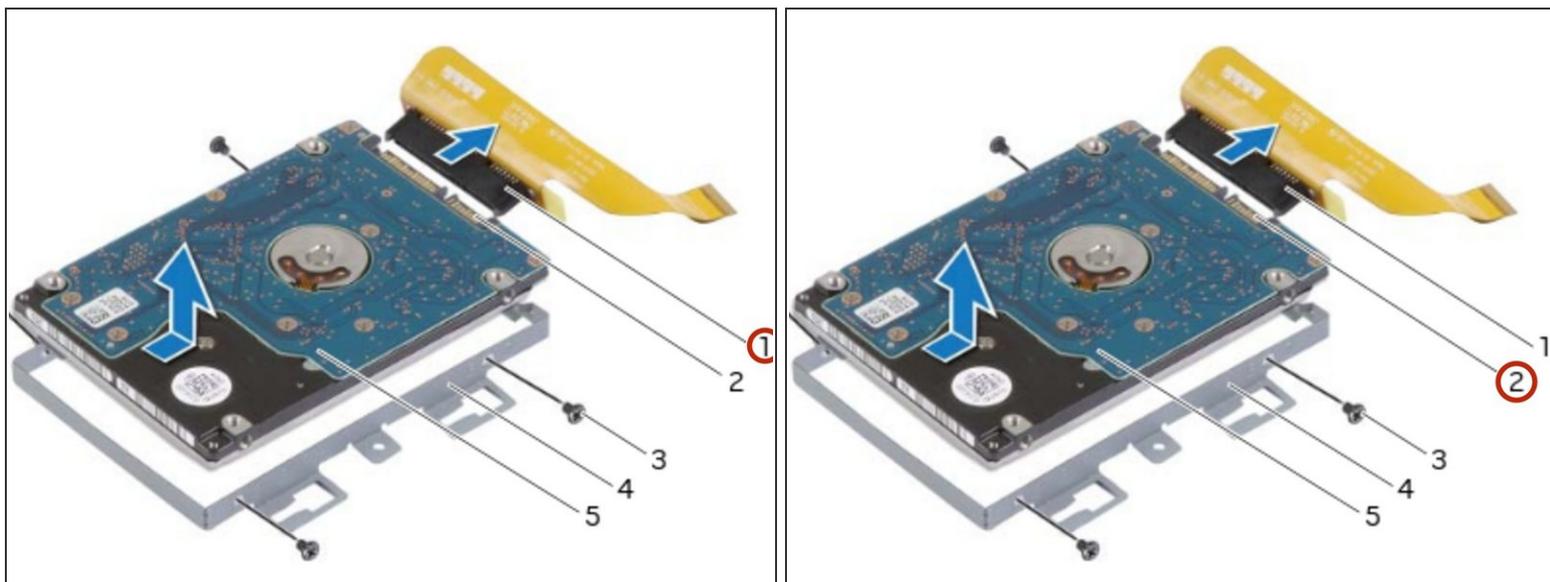

- Remove the screws that secure the secondary hard-drive to the secondary hard-drive bracket.

Step 23 — Slide and Lift the Hard-Drive

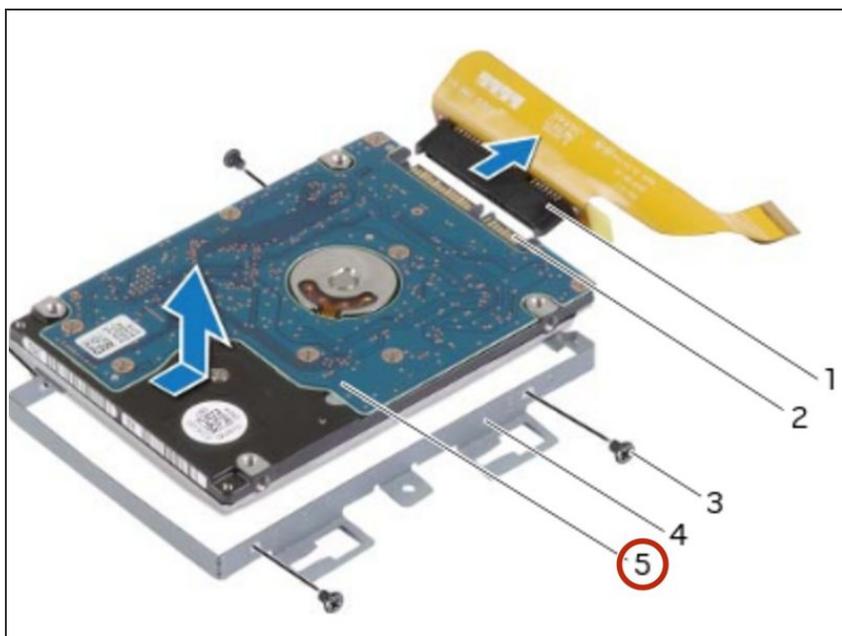

- Slide and lift the secondary hard-drive off the secondary hard-drive bracket.

Step 24 — Disconnect the Interposer

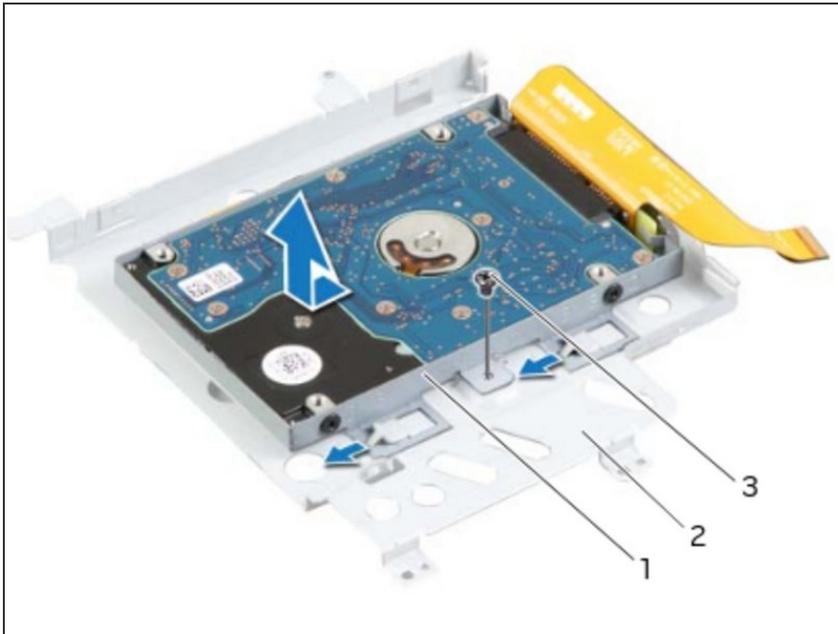

- Disconnect the interposer from the secondary hard-drive connector.

Step 25 — Connect the Interposer

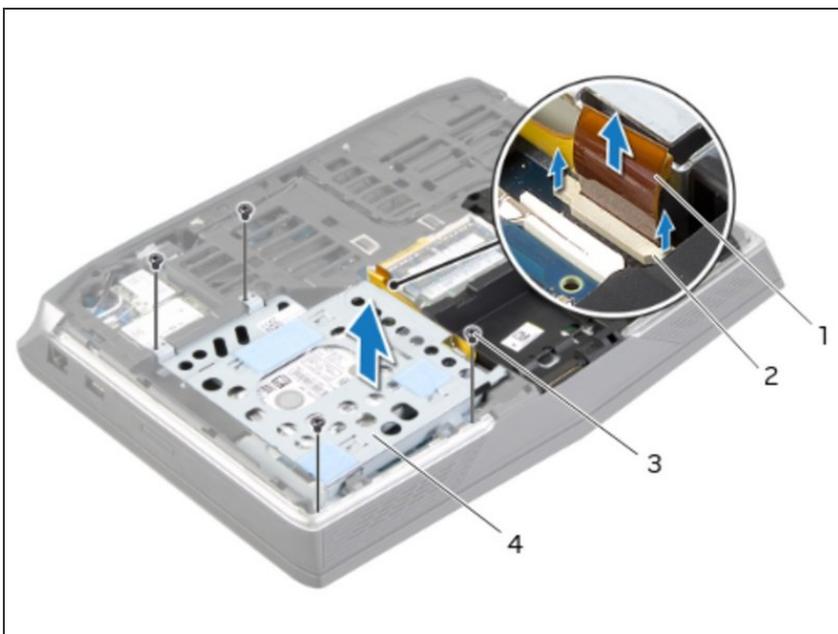

- Connect the interposer to the secondary hard-drive connector.

Step 26 — Placing the Secondary Hard-Drive

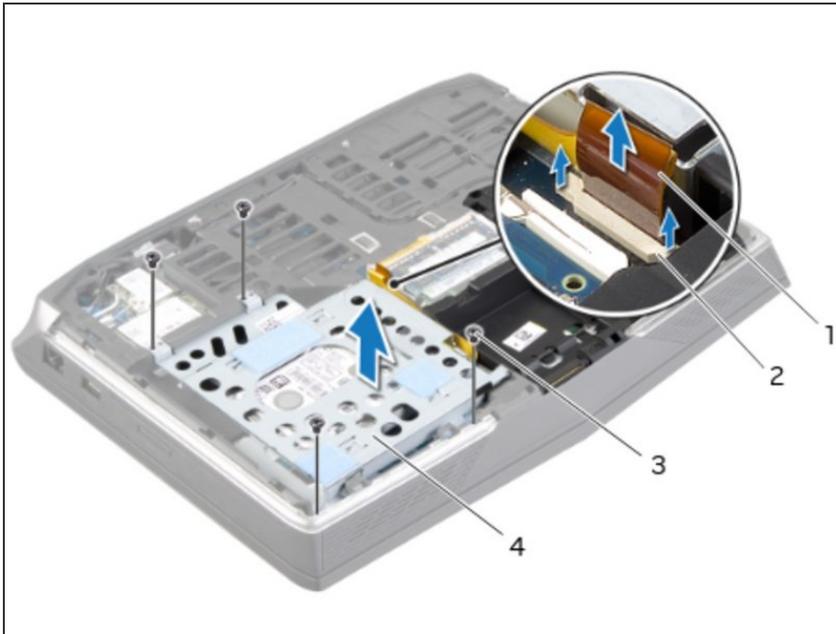

- Place the **NEW** secondary hard-drive in the secondary hard-drive bracket.

Step 27 — Align the Screw Holes

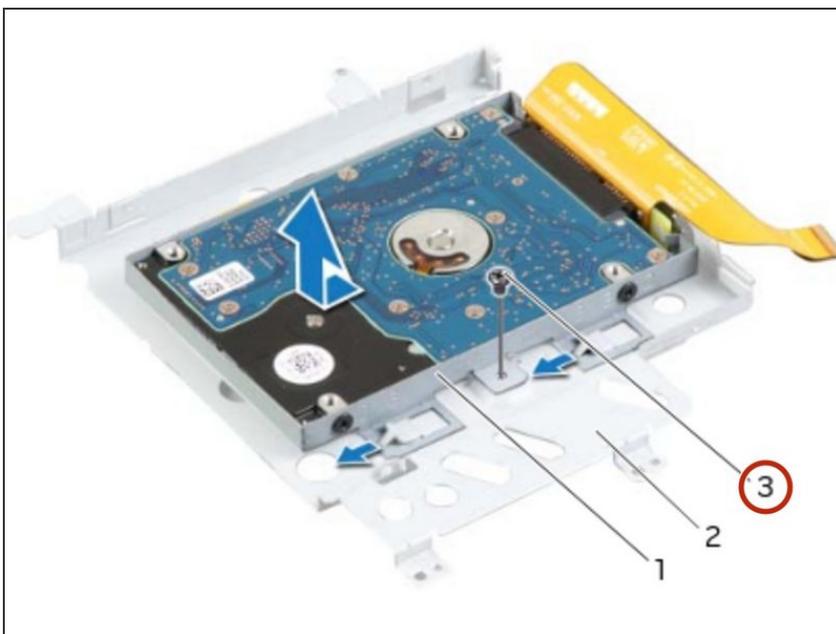

- Align the screw holes on the secondary hard-drive with the screw holes on the secondary hard-drive bracket.

Step 28 — Replace the Screws

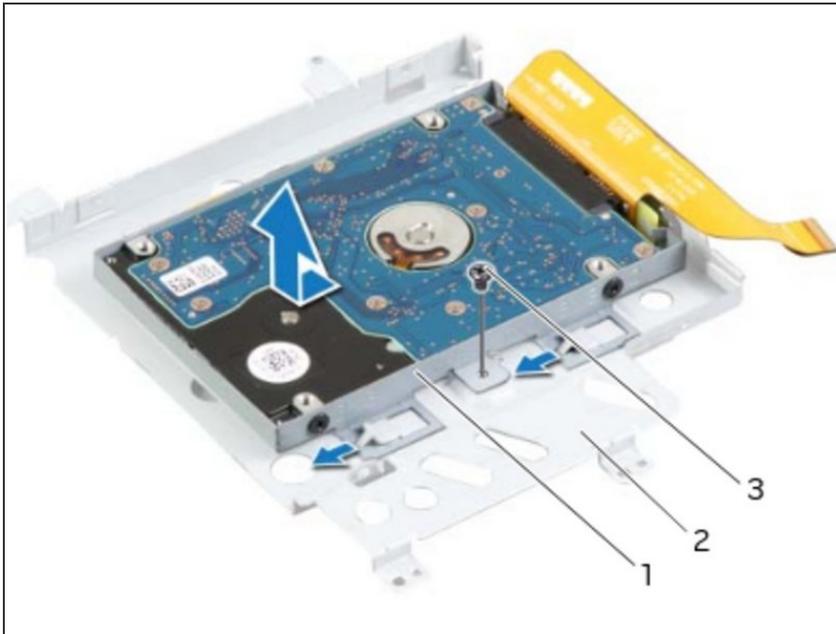

- Replace the screws that secure the secondary hard-drive to the secondary hard-drive bracket.

Step 29 — Align the Screw Hole

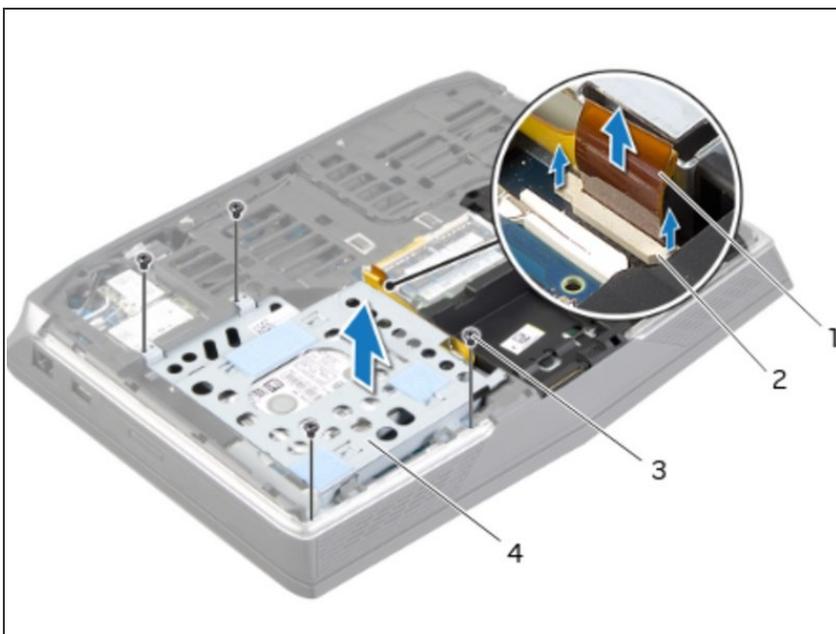

- Align the screw hole on the secondary hard-drive assembly with the screw hole on the main bracket.

Step 30 — Replace the Screw

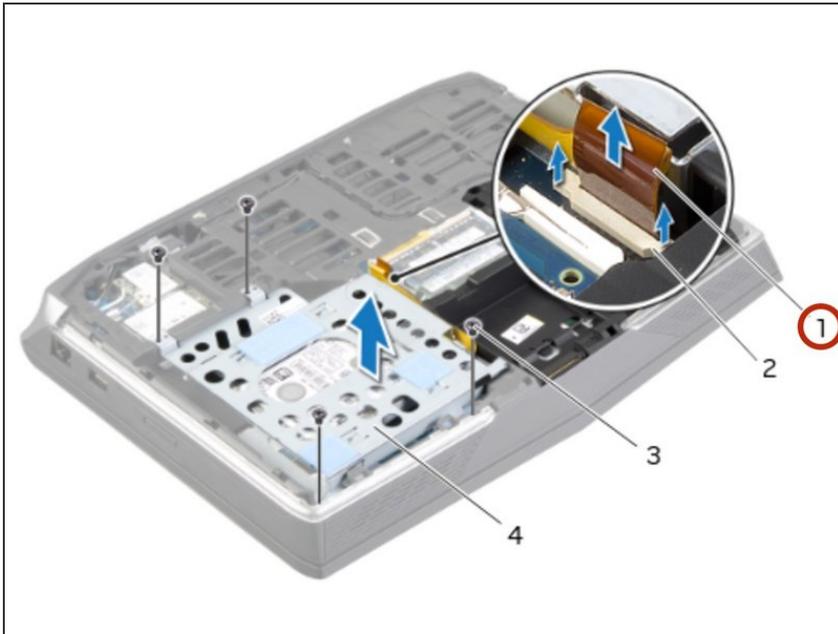

- Replace the screw that secures the secondary hard-drive assembly to the main bracket.

Step 31 — Turn the Hard-Drive Assembly Over

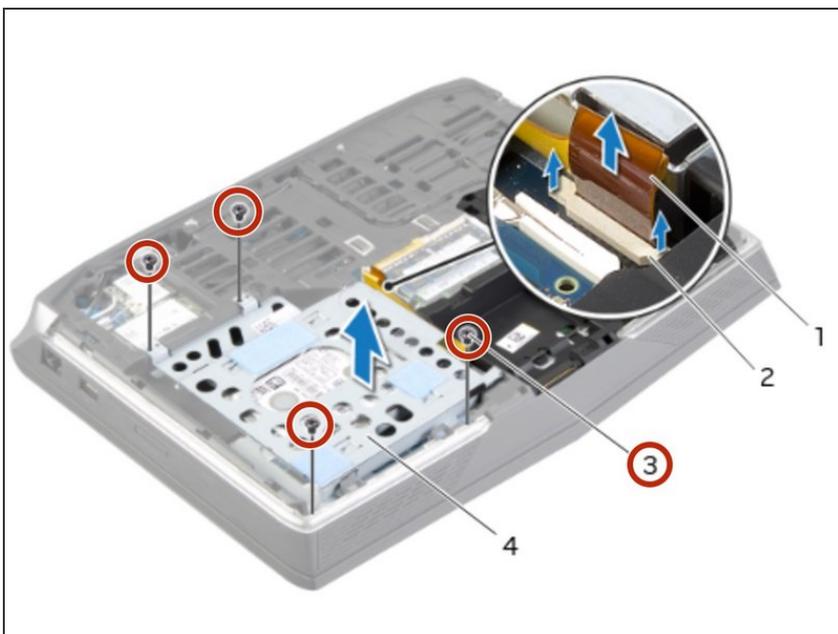

- Turn the secondary hard-drive assembly over.

Step 32 — Slide the Hard-Drive Cable

- Slide the secondary hard-drive cable into the system-board connector and press down on the connector latches to secure the cable.

Step 33 — Align the Screw Holes

- Align the screw holes on the secondary hard-drive assembly with the screw holes on the computer base.

Step 34 — Replace the Screws

- Replace the screws that secure the secondary hard-drive assembly to the computer base.

To reassemble your device, follow these instructions in reverse order.
