

# Autosampler Reset for Node Triggered Sampling (For Old & New Versions)

How to reset an ISCO autosampler once bottles have been collected.

Written By: Brandon Wong

## Step 1 — Switch to manual mode

- To enable manual mode, flip the switch to "Manual Mode"
- LCD screen will turn on

## Step 2 — Restart the sampling program

100 npler		, RESUME		ampler		STRE		AMPL.	ING 2	
i ENTER mode, press PROGRAM election.				a selection.						
n values.	CONTROL	NUMERIC	PROGRAM KEYS	ram values. PROGRAM CLEAR ENTRY	CON Ke			NUMERIC		PROGRAM
CLEAR ENTRY START SAMPLING	ON START NG	7 8	9 DISPLAY STATUS	START	ON OFF	START Sampling	7	8	9	DISPLAY STATUS

and the second	NEXT BOTTLE	• 0	PROGRAM	the second of the	STOP	NEXT BOTTLE	-	0	Þ	- And

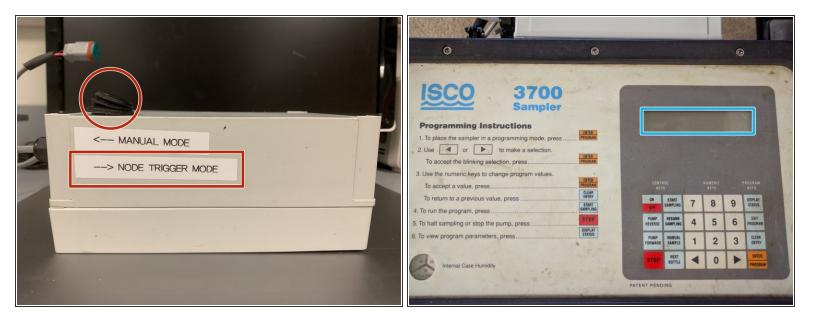

- Press On then press Start Sampling
- Press <u>Enter</u>

### Step 3 — Select bottle

ampler ns 1g mode, press	TAKT SAMPLING	ns regimede, press	700 mpler s mode.press
a selection.		a selection. Iss	selection. S
CLEAR EXTRY SAMPLING	DN START 7 8 9 DISPLAY	Cateron Control Contro	EARNY LANALER ALANALER BOT STATUT 7 8 9 DOPLAT
TOP	PUMP RESUME 4 5 6 PROGRAM	STOP PUMP RESUME 4 5 6 PROGRAM	STOP PUMP RESUME 4 5 6 PROGRAM
DISPLAY	PUMP FORWARD SAMPLE 2 3 CLEAR ENTRY	TOWN MANUAL 1 2 3 CLEAR FORWARD SAMPLE 1 2 3 CLEAR	POWWARD SAMPLE 1 2 3 BATT
the second second	STOP NEXT 0 DE BIER		

- Press the <u>number</u> of the bottle you want to sample on
- Press <u>Enter</u>
- LCD should now show which bottle it will take a sample in

### Step 4 — Switch to autonomous mode

- To enable autonomous mode, flip switch to "Node Trigger Mode"
- LCD should turn off
- If the autosampler is to be remotely triggered, avoid using the ON/OFF button to power off the sampler.

Now the sampler is ready to be triggered remotely by an open-storm sensor node.
