Dell Vostro 3550 Memory Module Replacement

In this guide, we will show you how to remove...

Written By: Johnathan Hammond

INTRODUCTION

In this guide, we will show you how to remove and replace the Memory Module.
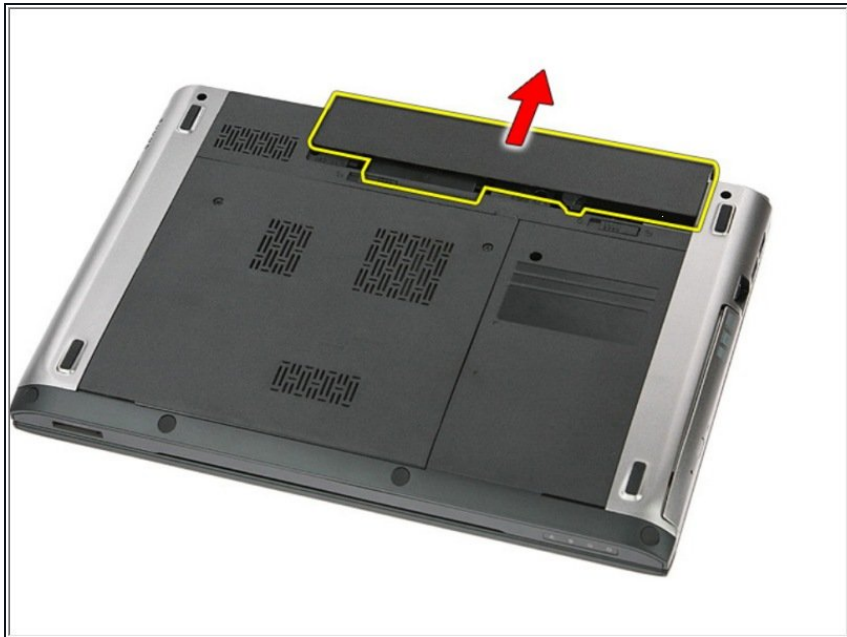

TOOLS:

Phillips #0 Screwdriver (1)

Step 1 — Unlocking the Battery

- Slide the release latches to unlock the battery.

Step 2 — Sliding the Battery

● Slide the battery and remove it from the computer.
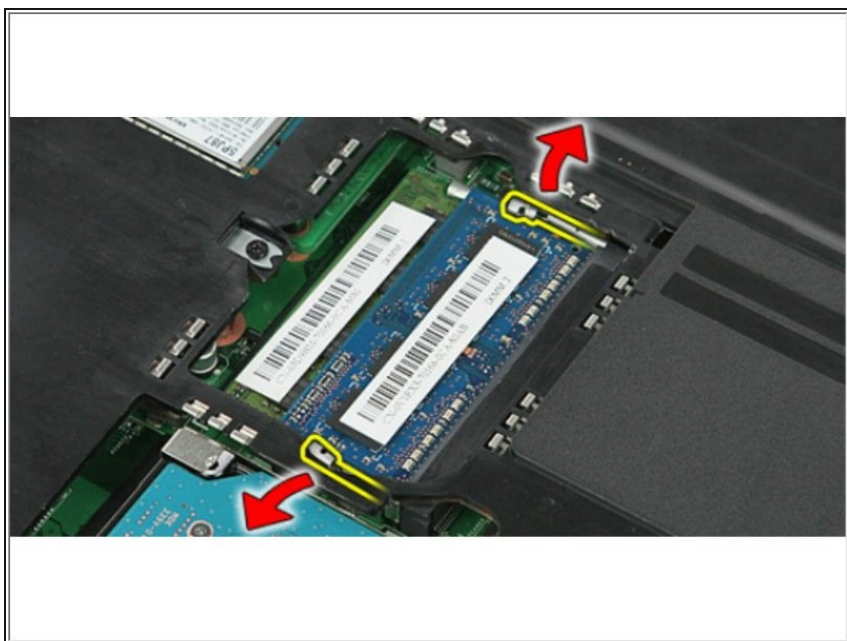

Step 3 — Remove the Screws

● Remove the three 7mm Phillips #0 screws that secure the access panel to the base of the computer.
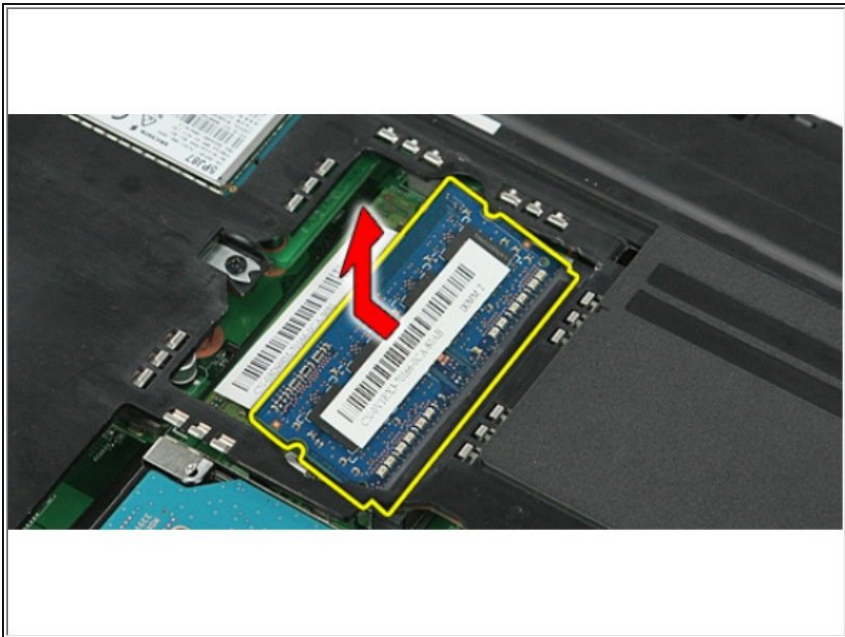

Step 4 — Lifting the Access Panel

● Lift the access panel up at an angle and remove it from the computer.

Step 5 — Memory Module

● Pry the retention clips away from the memory module until it pops up.

Step 6 — Remove the Memory Module

● Remove the memory module from its connector on the system board.

📌 If this is all you are doing Follow Step In Reverse if not Go to Next Step.
