## INTRODUCTION

Before completing this replacement guide, it is important to unplug the device. This replacement guide will show how to replace the camera from the LG 305C.

---

### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [Spudger](#) (1)
  - [JIS #000 Screwdriver](#) (1)
-

## Step 1 — Battery

- Pry open the back case on the device with a plastic opening tool and remove it.

## Step 2

- Pry the battery out of the device with a plastic opening tool and remove it.

### Step 3 — MicroSD card

- Dislodge the microSD card from the microSD card slot using your index finger and remove it.

### Step 4 — Internal Casing

- Remove the three 4 mm screws using a JIS screwdriver with a J000 head from the bottom part of the internal casing.

## Step 5

- Pry open the bottom part of the internal casing with the plastic opening tool and remove it.

## Step 6

- Remove the four 4 mm screws using a JIS screwdriver with a J000 head from the top part of the internal casing.

## Step 7

- Pry open the top part of the internal casing with the plastic opening tool and remove it.

## Step 8 — Motherboard

- Pry the screen from the internal circuit board with a plastic opening tool and remove it.

## Step 9 — Camera

- Pry the camera from the internal circuit board with the plastic opening tool and remove it.

## Step 10

- Detach the camera completely by using the spudger tool to poke through the camera attachment holes.

To reassemble your device, follow these instructions in reverse order.
