

Tt Esports Poseidon Z RGB KB-PZR-KLBRUS-06 Panel Replacement

This guide will show you step by step how to remove the panel from the keyboard.

Written By: Myron Myers

TOOLS:

- [iFixit Opening Tools](#) (1)
- [iFixit screwdriver with a J1 bit](#) (1)

Step 1 — Panel

- Flip the keyboard over.

Step 2

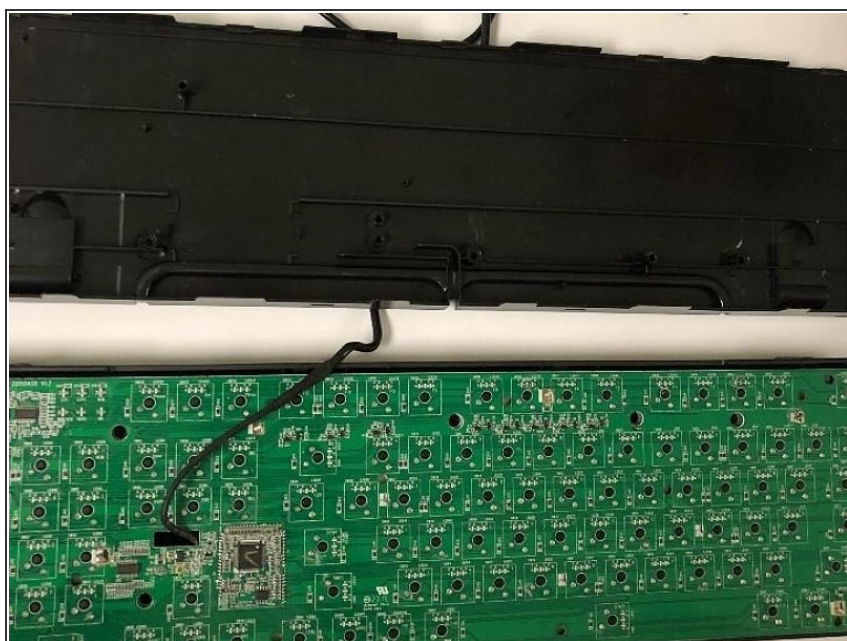

- Remove the three JIS #1 screws from the back cover.

Step 3

- Pry at these points with a plastic opening tool to unclip the two halves of the keyboard case.

Step 4

- Pull apart the two parts of the panel to expose the motherboard and keys.

To reassemble your device, follow these instructions in reverse order.
