INTRODUCTION

This guide will assist you in removing the display of your device. You'll need to be extra careful when removing the glass screen from your device.
Step 1 — Battery

ⓘ Make sure you turn the laptop off first.

● Close the laptop lid and flip it over so that Toshiba logo is facing down.
Step 2

- Remove the two 6.5 mm Phillips head screws indicated using a Phillips #00 screw driver.

Step 3

- Once the screws are removed, slide the battery pack out of the computer.

Step 4 — Back Panel

- Remove all 6.5 mm Philips head screws on the back cover of the laptop with a Philips #00 screwdriver.

- Use the plastic opening tool to remove the back cover from the laptop.
⚠ Be aware that static discharge can cause damage to sensitive electrical components within the computer. To avoid this you can wear an <u>anti-static wrist strap</u>.

Step 5 — Screen

- Unscrew the four 6mm screws from each of the laptop hinges using a Philips head #00 screwdriver.

Step 6

- Disconnect connect the ribbon marked in red.

- Disconnect all ribbons and cables marked in orange.

Step 7

- Flip your laptop back to the front.

- Lift up the screen cover.

Step 8

- Gently pull the screen to disconnect the monitor from the hinges.
Step 9

- Use the plastic opening tool to pry the plastic covering off of the monitor.

⚠ Be careful not to break the glass, as this can cause injury.

Step 10

- Remove the four 3mm Phillips head screws with a Phillips #00 screwdriver.

- Gently remove the screen from the device.

To reassemble your device, follow these instructions in reverse order.
