Step 1 — Battery

⚠ Turn off the computer. If you are unsure whether the computer is off or in Hibernation, turn the computer on, and then shut it down through the operating system.

Step 2

● Turn the computer upside down on a flat surface.

Step 11

- Use a Phillips # 1 Screwdriver to unscrew the three screws under the CD player
Step 12

- Flip the device around and open it. Use the blue spudger tool to remove the casing around the keyboard space by driving it the crease and propping it up.

- Once you have used the spudger tool all the way around the casing, lift the casing up from the device.
