## INTRODUCTION

These step-by-step instructions are provided so you can remove the top cover of the robot. This can be done as a step to remove the wheel or check the wiring.

## 🔧 TOOLS:

- Phillips #1 Screwdriver (1)
- T10 Torx Screwdriver (1)

This document was generated on 2020-11-28 06:45:47 AM (MST).

## Step 1 — Top Face Panel

- Grab the rear bumper with both hands on either side.

## Step 2

- Firmly pull the bumper forward at a steady pace.

⚠️ When pulling the bumper forward avoid being too rough because the bumper might break.

This document was generated on 2020-11-28 06:45:47 AM (MST).

## Step 3

- Looking from above, remove the two 11mm screws with a Torx T10 screwdriver.

## Step 4

- Place the robot on its back and remove the six 11mm screws using a Torx T10 screwdriver.
## Step 5

- Push the clips, located in the back side, inward.

- Gently lift up the top cover until you can see the wires. Then gently un-clip all the wires.

⚠️ When you lift the top cover be careful because the wires are thin and fragile.

## Step 6

- Once you have carefully removed the wire clip; you can fully remove the top cover.

To reassemble your device, follow these instructions in reverse order.
