

Raleigh M20 Pedal Removal

By the end of this guide one should be able to replace old or broken bicycle pedals of your Raleigh M20.

Written By: William Beechinor

INTRODUCTION

This guide will show you how to remove a broken or malfunctioning pedal and replace it with a new one for your Raleigh M20.

TOOLS:

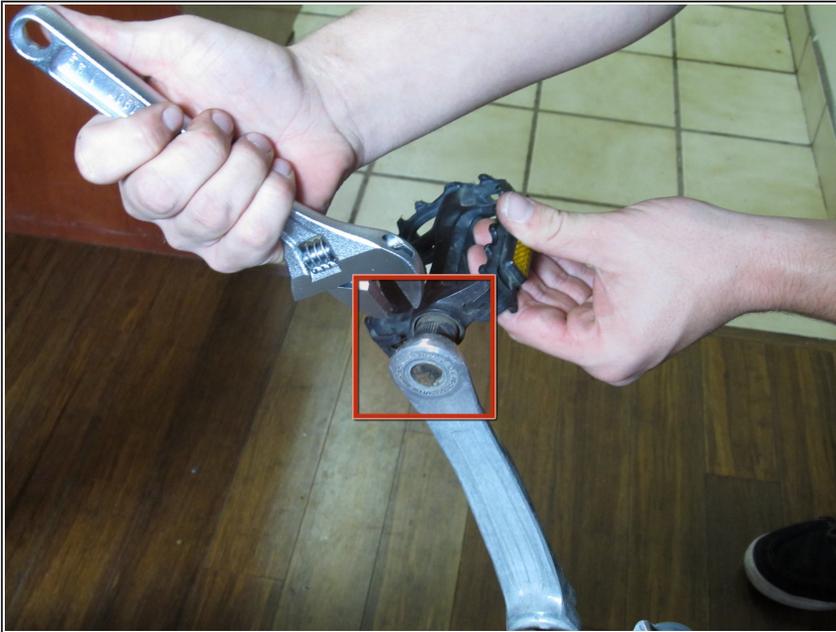

- [Adjustable 8inch Crescent Wrench](#) (1)

PARTS:

- [Pedal](#) (1)

Step 1 — Raleigh M20 Pedal Removal

- Use an 8" adjustable crescent wrench to fit it into the base of the pedal.

Step 2

- Twist the the wrench in a counter -clockwise direction to unscrew the right-side pedal (The chain side).
- Repeat the process on the other side with a clockwise direction.

Step 3

- Turn the wrench continuously until the pedal detaches from the crank arm.

To reassemble your device, follow these instructions in reverse order.
