# Thermaltake Theron Plus Button Fix

This guide will provide step by step...

Written By: Steven Kontra

INTRODUCTION

This guide will provide step by step instructions to show how to fix a button that is no longer clicking properly.

| 🔧 **TOOLS:**	⚙️ **PARTS:**
Phillips #1 Screwdriver (1)	Scotch tape (1)

Step 1 — Top cover

- Remove the plastic cover and pack of weights.

- Remove the two 1.0 mm foam covers with tweezers.

- Peel away the plastic screw cover with tweezers.

Step 2

- Remove the four 1.0 mm screws with a Ph #1 screwdriver.

- Gently remove the top of the mouse.

Step 3 — Thermaltake Theron Plus Button Fix

- Flip the cover of the mouse over.

- Fold a piece of tape over on itself. This should make both sides sticky.

- Cover both buttons with tape to increase the surface area of each click.

To reassemble your device, follow these instructions in reverse order.
