

# Altec Lansing BoomJacket 2 Battery Replacement

How to replace your Altec Lansing BoomJacket 2 battery.

Written By: Zach Braaten

## INTRODUCTION

If your BoomJacket 2 loses charge rapidly, or fails to charge at all consider replacing the battery.

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)  
PH1
- [Tweezers](#) (1)
- [Metal Spudger](#) (1)

### PARTS:

- [4mm x 12mm screw](#) (6)  
Phillips Head
- [Rubber Stopper](#) (6)  
*A rubber plug that keeps the screw sealed*

## Step 1 — Altec Lansing BoomJacket 2 Disassembly

- Starting from any side, use your fingers to grab the black rubber sleeve and gently pull away from the speaker on both sides.

## Step 2

- Using your fingers, grab the blue sleeve from one side and pull away from the unit.

### Step 3

- At each of the marked pry spots, use the metal spudger to lift the speaker grill away from the case.
- ⚠️ Avoid using excessive force to prevent bending the grill.

### Step 4

- Use the tweezers to remove the six rubber stoppers. There are four in the middle and two on the sides.

## Step 5

- Use the PH1 Phillips screwdriver to remove the six 12mm screws that lie underneath each rubber stopper.

## Step 6

- Gently pull apart the front panel from the base of the speaker.

## Step 7 — Battery

- The battery will be in the middle of the speaker when the case is open.

## Step 8

- Pull firmly from both sides of the pin to disconnect the battery cable from the motherboard.
  - Pull battery up and away from speaker without catching any other components.
- ⚠ Motherboards have fragile components and can easily be damaged if they are hit or pulled on while extracting other parts.

To reassemble your device, follow these instructions in reverse order.
