INTRODUCTION

Use this guide to remove the rear lens cover of your LG V20.

TOOLS:
- iFixit Opening Picks set of 6 (1)
- iOpener (1)

PARTS:
- LG V20 Rear Lens Cover (1)

Step 1 — Back Cover

- Press the button on the lower right side of the LG V20 to open the clamp that holds the back cover on the back side of the phone.

- Remove the back cover.

Step 2 — Battery

⚠️ Before disassembling your phone, discharge the battery below 25%. A charged lithium-ion battery can catch fire and/or explode if accidentally punctured.
- Insert a spudger or your fingernail under the battery at the small recess on the lower edge.
  - Be careful not to deform or puncture the battery.
- Pry up and remove the battery.

Step 3 — Rear Lens Cover

- [Use an iOpener](#) to loosen the adhesive beneath the rear lens cover.

Step 4

- Use the tip of an opening pick to gently pry up the rear lens cover.

- Use the tip of the opening pick and slide around the whole rear lens cover to cut the adhesive beneath.

Step 5

- Remove the rear lens cover.

To reassemble your device, follow these instructions in reverse order. Apply new adhesive where it's necessary.
