INTRODUCTION

The battery supplies the device with power without having to keep the device plugged into a charger. If your device will not turn on, try plugging it into the charger. If that doesn't work, use this guide to replace the battery.

Step 1 — Battery

- Slide both of the latches to the outside to release the battery.

Step 2

- Pull the battery out by lifting the battery cover away from the laptop.

To reassemble your device, follow these instructions in reverse order.
