### TOOLS:

- [T8 Torx Screwdriver](#) (1)
-

## Step 1 — How to Fix a Whirlpool WDF330PAHW Door Latch

- Open the dishwasher door and look for the retaining screws around the side edge and top edge of the dishwasher door.

## Step 2

- Using a T8 Torx screwdriver remove the two screws by turning counter clockwise.

### Step 3

- Lift the inner panel enough that you can loosen the two securing bolts on the door latch with the wrench.
- When loosening the two bolts, leave them in and don't remove them.

## Step 4

- Carefully raise the dishwasher door to align the door latch with the strike plate.

 Watch fingers while raising dishwasher door.

## Step 5

- Hold the door latch with your finger tips to align the door latch.
- Then lower the door and tighten the door latch securing bolts.

## Step 6

- Install the inner door panel retaining screws.
- Proceed to tighten two screws with the T8 Torx screwdriver.
- When tightening the two screws turn clockwise.
- Then close the dishwasher door.
