How to check the battery health of An IOS device

This guide shows you how to check the battery...

Written By: Javen

INTRODUCTION
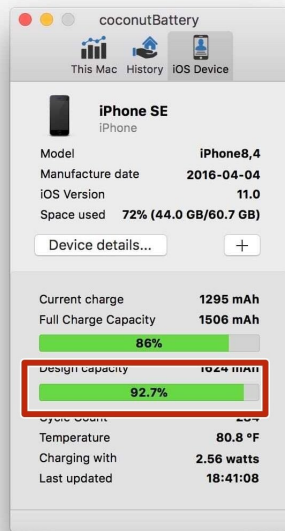

This guide shows you how to check the battery of an iOS device using a software called CoconutBattery.

Step 1 — Download CoconutBattery

- Install Coconut Battery by going to https://www.coconut-flavour.com/coconutb...

Step 2 — Check battery Health

- Check the battery heath

- The red bar shows how much battery charge it can hold now. If it is under 80%, you should get it replaced

Step 3

- You are done

- You can use this same way to check the health of your MacBook's battery by clicking on This Mac at the top of the app.

You are done!

You now have a way to check the battery health of your IOS device.
