

Armani Exchange AX1017 Lens Replacement

This guide aims to replace a lens on the Armani Exchange AX1017 glasses frame.

Written By: Collin Barlow

INTRODUCTION

If you have ever had to go to an eyeglasses store, you already know how expensive they can be. This guide aims to be a cheaper alternative to replacing the lens in your Armani Exchange AX1017 glasses frame. It is safe, quick, and easy for anyone with glasses to do.

TOOLS:

- [Eyeglasses Repair Kit](#) (1)
 - [Microfiber Cleaning Cloths](#) (1)
-

Step 1 — Glasses Lens

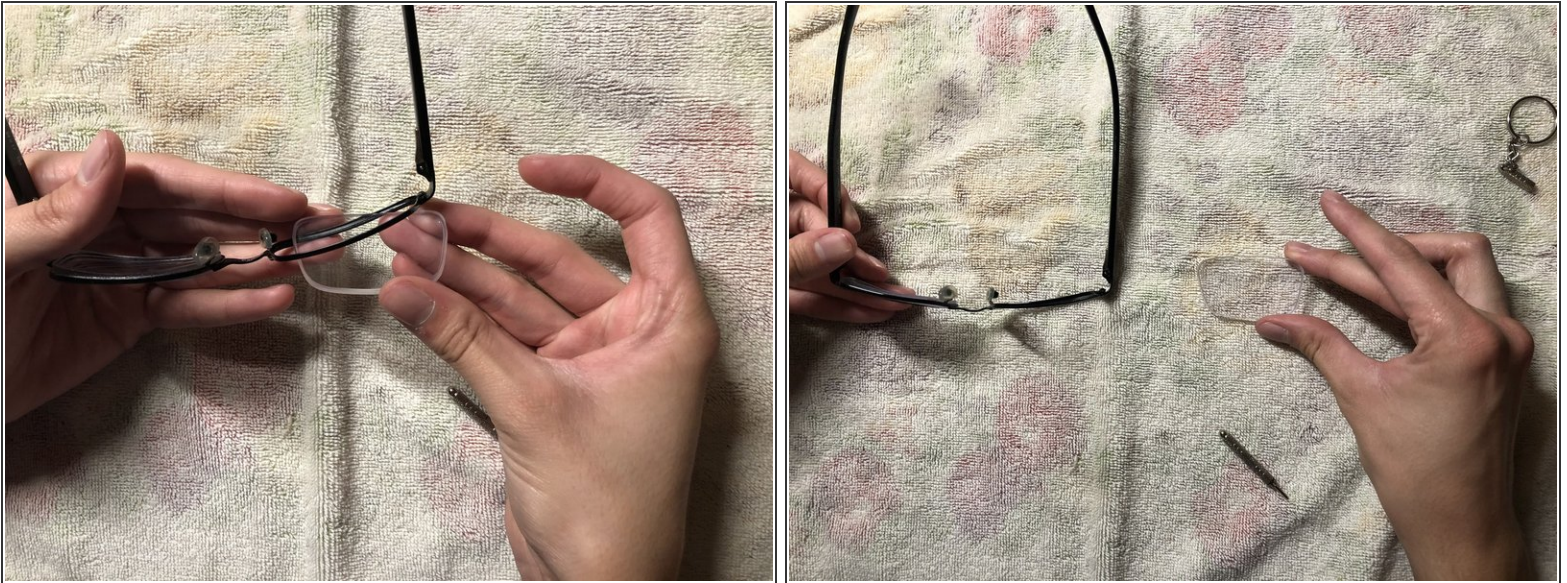

- Clean the outer frame of the glasses with a clean cloth.

Step 2

- Remove the screw between the lens and the frame using the glasses repair kit's Phillips-head screwdriver.

Step 3

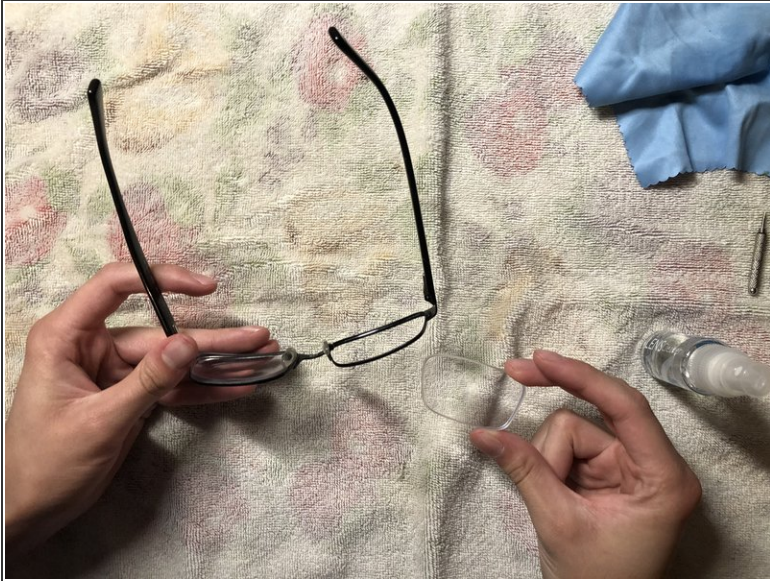

- Carefully remove the damaged lens from the unscrewed frame.

Step 4

- Once removed, take a damp cloth (a cloth soaked in rubbing alcohol is preferred for the best clean) and clean inside of frame.

Step 5

- Take your new lens and place it carefully into the frame. Make sure that the lens is slotted correctly into the frame, aligning the edges on the lens and the frame.

Step 6

- Screw the frame back together using the Phillips head screwdriver, ensuring that the new lens is slotted correctly into the frame.

The guide gives complete instructions on removing, replacing, and returning the glasses back to their original state.
