

2013 Honda Civic Headlight Replacement

Replace a burnt-out headlight in your 2013 Honda Civic. This guide also applies to Honda Civics 2012-2015.

Written By: Brooke McCown

INTRODUCTION

Driving with a burnt-out headlight at night can be dangerous and against local laws and regulations. If your 2013 Honda Civic has a burnt-out headlight, this guide will walk you through how to replace the bulb. When changing the bulb, make sure to be careful to not damage the bulb. Also make sure the vehicle is turn off when starting.

Changing the bulb in a Honda Civic is relatively simple and you'll be back on the road again in no time!

This guide is applicable to all Honda Civics in the 9th generation, from 2012-2015.

TOOLS:

- [Flathead Screwdriver](#) (1)

PARTS:

- [Sylvania SilverStar 9006 ST ZXE Halogen Headlight Bulb, 2 Pack](#) (1)

Step 1 — Headlight

- Lift the latch to open the car hood.

Step 2

- Pry up the center of the fastener with a flat-head screwdriver.

Step 3

- Pop the rivet loose and remove it.

Step 4

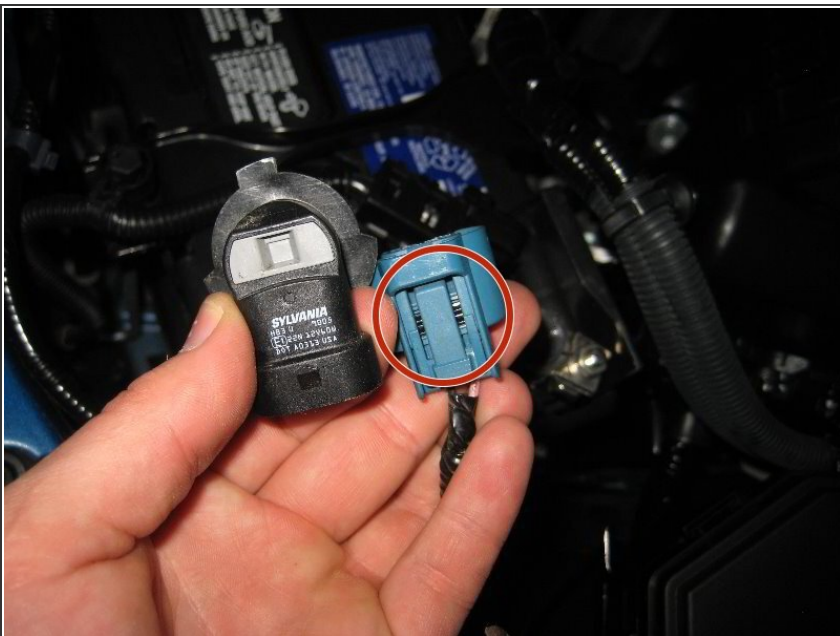

- Remove the wiper fluid tube.

Step 5

- Locate the headlight internally.
- Turn the headlight counter-clockwise to unlock it.

Step 6

- Press down on the latch to unlock the bulb from the connector.
- Remove the burnt-out bulb.
- Replace with the new bulb.

Step 7

- Turn clockwise to lock.
