

2014 Chevy Cruze Headlight Bulb Replacement

This guide will show you how to replace the headlight bulbs on your 2014 Chevy Cruze.

Written By: Caiden

INTRODUCTION

This guide will help you to replace the headlight bulb in your 2014 Chevy Cruze. Your headlights play a crucial role in driver safety; however, sometimes they burn out. Luckily, the solution is quick and easy.

Be sure to turn off your car and engage the parking brake.

TOOLS:

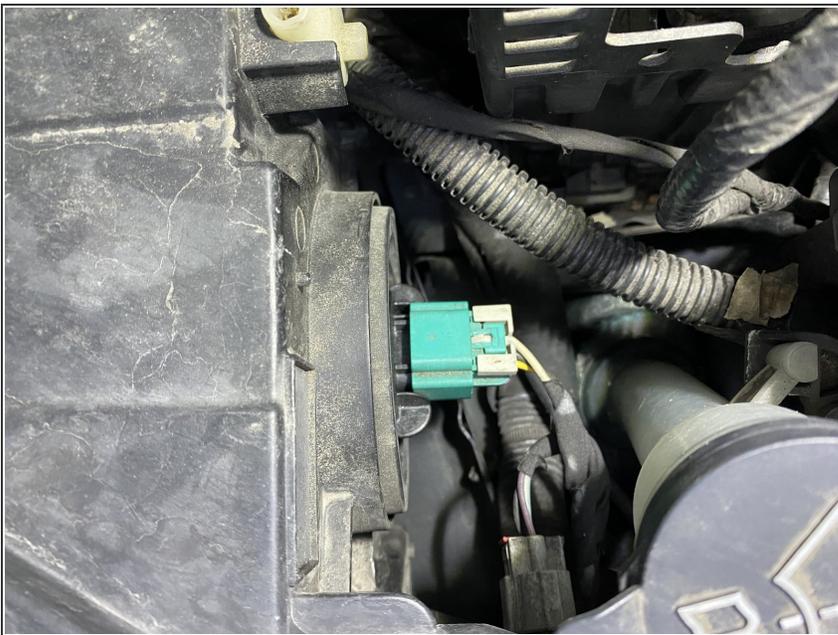

- [Metal Spudger](#) (1)
 - [Latex or nitrile gloves](#) (1)
-

Step 1 — Headlight Bulb

- Open the hood of your Chevy Cruze. The headlight bulbs are shown in the image.

Step 2

- Put on rubber gloves.
- Twist the headlight bulb counterclockwise until you can pull it from its socket.

Step 3

- Using a prying tool, push the gray locking mechanism back until it is completely removed.
- ⓘ The locking mechanism can be removed by sliding it in the opposite direction from the headlight bulb.

Step 4

- Pull the old headlight bulb from the green socket.

To reassemble your device, follow these instructions in reverse order.
