Disassembling Kodak Easyshare C813 Back Cover

This tutorial demonstrates how to remove the...

Written By: Susan Marano

INTRODUCTION

This tutorial demonstrates how to remove the back cover from the camera

⚒ **TOOLS:**

Phillips #00 Screwdriver (1)
iFixit Opening Tool (1)

Step 1 — Battery

- Turn off camera by firmly pressing the power button that is located on the top of the camera near the selector dial.

Step 2

- Press thumb firmly on battery door and slide it in the direction of the arrow.

- Lift thumb allowing the door to swing open.
Step 3 — Back Cover

- Before removing back cover, it is advisable to use an [anti-static wrist strap](#) to prevent damage to electronics.

Step 4

- Turn the camera off by firmly pressing the power button located on top of the camera.

Step 5

- Locate the 7 screws holding the back cover on.
  - Three screws are located on the bottom of the camera.

  - Two screws are located on the side shown in the photograph.

  - Two final screws are located on the opposite side shown in the photograph.
Step 6

- Remove all 7 screws:
  - Hold the camera firmly with one hand so that you can still see a screw.

  - Place the Philips 00([Found here](#))screwdriver into the screw.

  - Turn the screwdriver to the left until it is free.

  - Repeat for the remaining screws.

Step 7

- Use plastic opening tools to slightly open the side of the case.

- Insert a plastic opening tool and apply pressure to the internal three tabs at the top.
  - The first two are near the words "3X Optical Zoom".

  - The third is near the shutter button.

Step 8

- Gently pull apart the back cover from the rest of the camera.
  - Make sure there are no more screws or tabs keeping the cover on.

- Use the plastic opening tool to separate any sides still closely connected.
