Dell Latitude D620 Keyboard Replacement

Written By: Miguel Wong

INTRODUCTION

Guide to removing the keyboard from the D620.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- Spudger (1)

Step 1 — Keyboard

⚠️ Power down the laptop and remove the battery.

● Open the laptop cover all of the way.

Step 2

● Locate the notch under the cover at the top of the keyboard

● Using the spudger as a lever, lift the plastic covering

● Carefully remove the rest of the covering from right to left

Step 3

- Unscrew the top portion of the keyboard using a #00 screwdriver

Step 4

- Hold keyboard from the top and gently pull towards the LCD screen to remove the keyboard from the case

⚠️ Don't pull on the keyboard too forcefully because it is attached to the motherboard with a short, thin ribbon cable

Step 5

- Once keyboard is out of the case, lay it face-down on the track pad

Step 6

- Using a small spudger, pull back on the black bar to release the blue lever

Step 7

- Pull up on the metal bar connected to the socket to detach the ribbon cable

To reassemble your device, follow these instructions in reverse order.
