

# iPod Touch 4th Generation speaker soldering

iPod Touch Logic Board soldering points

Written By: Tysl332

## INTRODUCTION

This guide will help you in identifying the soldering joints locations for the loud speaker on the iPod Touch 4th Generation

### TOOLS:

- [Soldering Iron](#) (1)
- [Solder](#) (1)
- [Desoldering Braid](#) (1)
- [Flush Wire Cutters](#) (1)

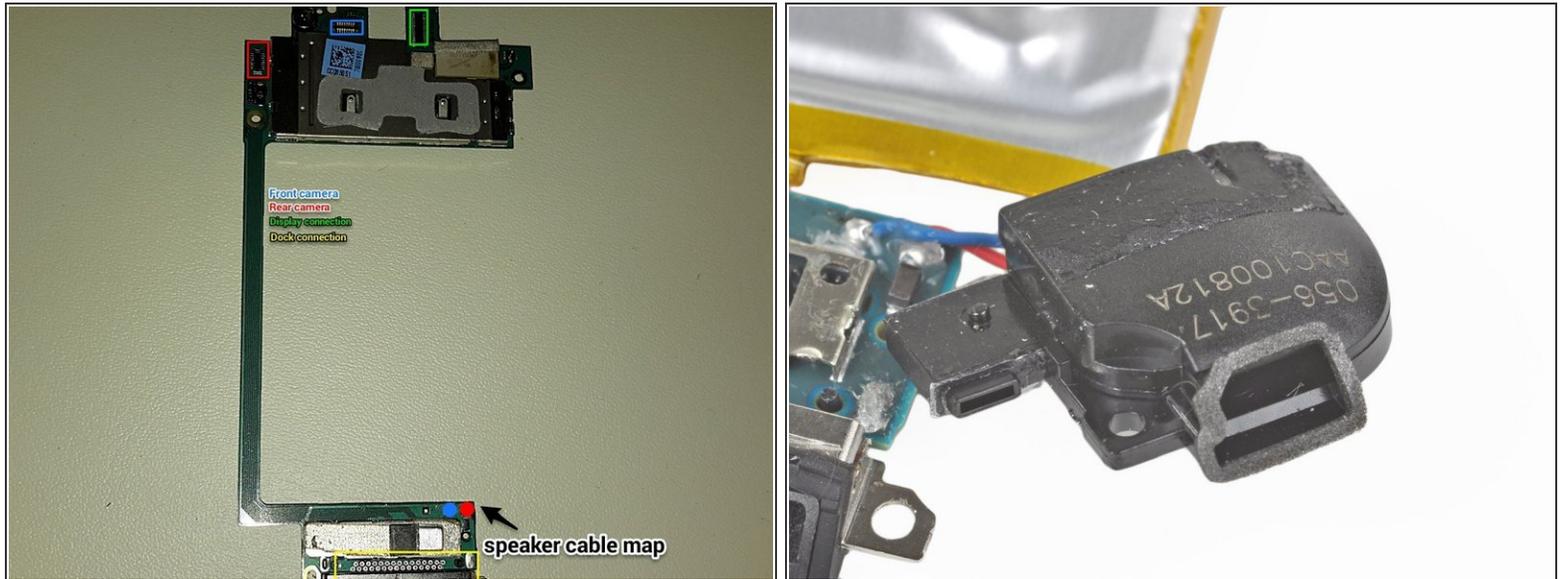

*to strip the wires, of existing loud speaker unless you've got a replacement*

- [Solder Vacuum](#) (1)

### PARTS:

- [iPodTouch 4th Generation Loud Speaker replacement](#) (1)

## Step 1 — iPod Touch 4th Generation speaker soldering

- I've boxed where the ribbon cable connectors go for the screen and camera.
- The soldering joints are marked with a **Blue** and a **Red** dot to indicate where to solder the speaker wires.
  - The second picture shows the wires soldered to the logic board.
- The loud speaker replacement was very tedious job.. anyways Good Luck

To reassemble your device, follow these instructions in reverse order.
