

Toshiba Satellite M45 Optical Drive Replacement

Written By: Nick

INTRODUCTION

This guide will illustrate how to replace your optical drive.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
 - [iFixit Opening Tool](#) (1)
-

Step 1 — Optical Drive

- Use the #1 Phillips head screwdriver remove the Optical Drive screw.
- Use the blue iFixit Opening Tool to pry the Optical Drive out of the slot from the side of the casing.
- Use your hands to pull the rest of the Optical Drive out.

To reassemble your device, follow these instructions in reverse order.
