Step 3 — Remove Screws To the Acess Panel

- Use Phillips #00 screwdriver to remove three screws

- Remove blade cutter

- Use Phillips #00 screwdriver to remove remaining two screws from the battery compartment

Step 4

- Gently pull the access panel up to separate from the device

⚠ Some electrical wiring will be exposed and will not detach. Be careful not to damage any electrical wiring when removing access panel.

Step 5 — Remove Back Panel

- Use Phillips #00 screwdriver to remove six screws

- Slowly separate back panel

⚠ Gears attached to the back panel are not secured and have a tendency to fall out. This will cause difficulty when reassembling

Step 6 — Remove Rubber Transport Roller

- Gently pull rubber transport roller up to remove

- Replace rubber transport roller
