INTRODUCTION

A common problem users have with this phone is difficulty locating and replacing the battery. This guide will take you through the steps of finding and replacing the battery.

www.iFixit.com

Step 1 — Removing the Battery Cover

- Hold the mouthpiece of the handset and locate the lock-unlock text.

- Twist the battery cover counterclockwise from the "lock" to the "unlock" position.

Step 2 — Disconnecting the Battery Wire

- To disconnect the battery pack wire from the phone, squeeze the tab against the connector and pull connector straight up from the socket.

Step 3 — Removing the Battery Pack

- Pull the battery from the battery compartment.

ⓘ You may need to gently wiggle the battery back and forth in its compartment to help loosen it.

To reassemble your device, follow these instructions in reverse order.
