

HTC MyTouch 4G Battery Replacement

This guide will give you a step by step process into replacing your HTC MyTouch 4G battery.

Written By: leo

INTRODUCTION

You may need to replace the battery for multiple reasons; for example, you may have over charged it which makes it more likely to not work. This guide will show you how to replace the defective battery.

TOOLS:

- [iFixit Opening Tools](#) (1)

PARTS:

- [HTC MyTouch 4G Battery](#) (1)

Step 1 — Flip Phone Over

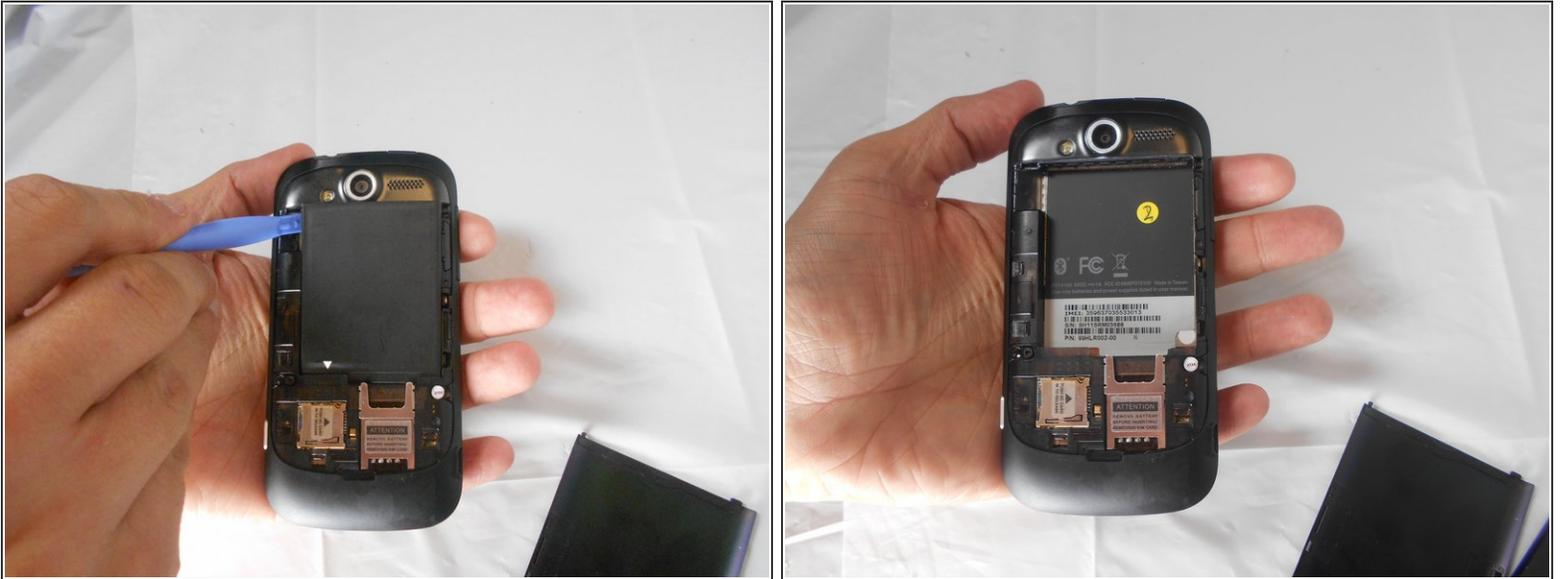

- Flip your phone over and hold the phone with the back facing you.

Step 2 — Remove the back case.

- Place the prying tool into the notch at the bottom of the case and pull up to remove.

Step 3 — Remove the battery

- Use the plastic prying tool in the upper left-hand corner notch of the battery to remove.

To reassemble your device, follow these instructions in reverse order.
