# Motorola Moto X 2nd Generation Front Camera Replacement

Before you begin, download the Rescue and Smart...

Written By: Sophia

INTRODUCTION

Before you begin, download the [Rescue and Smart Assistant](#) app to backup your device and diagnose whether your problem is software or hardware related.

🔧 TOOLS:

[Tournevis Torx T3](#) (1)
[Médiators iFixit](#) (1)
[Spudger (spatule antistatique)](#) (1)

Step 1 — Front Camera

- Remove SIM card tray. Remember to power off the phone at first.

Step 2

- Push the eject pin to open a gap and place a guitar pick into the gap.

Step 3

- Slide the guitar pick to cut the adhesive sticker and peel off the soft back cover carefully.

## Step 4

- Remove those two pieces rubber cover.

Step 5

- Release power button connecting flex connector and battery connector.
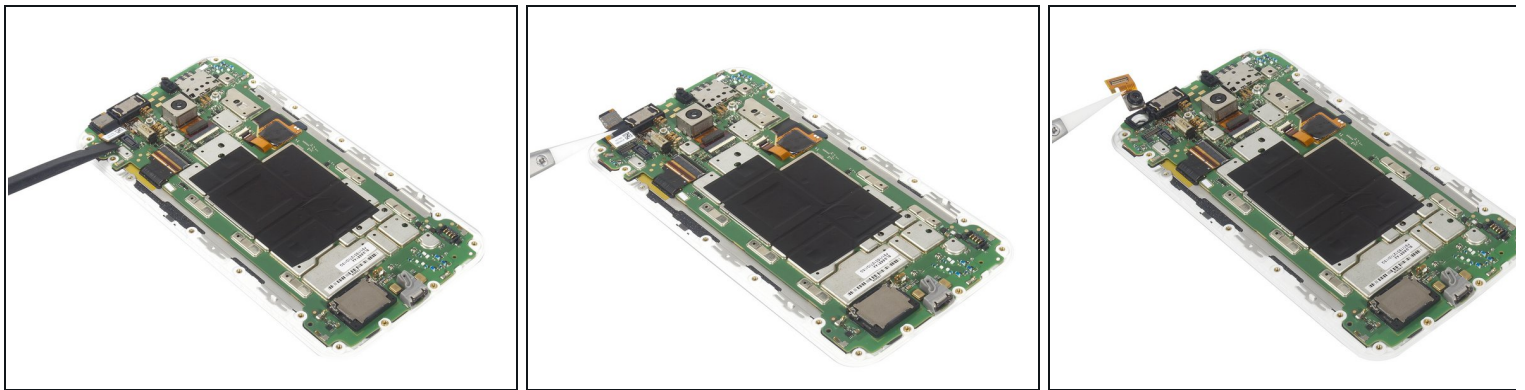

Step 6

- Twist off all 18 black torx screws and remove middle housing from front assembly.

Step 7

- Release front camera connector and remove it.

To reassemble your device, follow these instructions in reverse order.
