INTRODUCTION

Replace the aging built-in keyboard.

🔧 TOOLS:

- Phillips #1 Screwdriver (1)
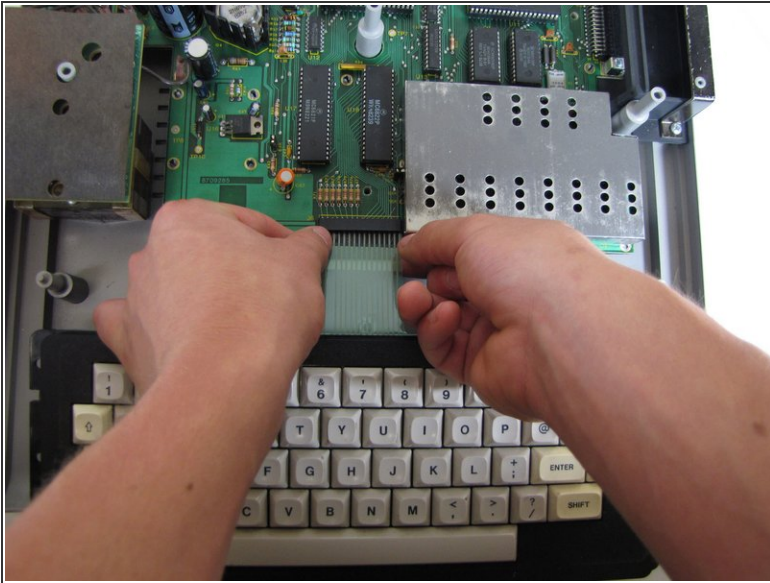

Step 1 — Outside Casing

- Flip the computer over.

- Remove the two 24.1mm Phillips screws near the front of the case.

- Remove the five 33.0 mm Phillips screws towards the back of the case.

Step 2

- Carefully flip the computer right side up.

- Lift off the top half of the case.

Step 3 — Keyboard

- Near the motherboard, gently pull the keyboard ribbon cable until it becomes free.

- Lift the keyboard out of the case.

To reassemble your device, follow these instructions in reverse order.
