## Step 1 — Rear Case Assembly

- Remove the micro SD card slot from the left side of the device using either the metal pin included with the device or a SIM card eject tool.

## Step 2

- Use a plastic opening tool and/or opening pick to gently pry the back panel away from the device. Work your way around the device, slowly increasing the gap.

**i** The back panel has small clips and light adhesive that easily releases from the device.

To reassemble your device, follow these instructions in reverse order.
