Step 1 — Base Gear

- Use pliers to grip the gear inside of the top of the device.

- (i) You may have to remove a sticker that is covering the slit at the center of the bottom before completing the next step.

- Insert a flathead screwdriver into the slit at the bottom of the device while still holding the pliers in place gripped on the gear.

- Lay the device on its side. Holding the screwdriver stationary to hold the bottom side in place, use the pliers to unscrew the gear by turning the pliers CLOCKWISE.

Step 2 — Casing
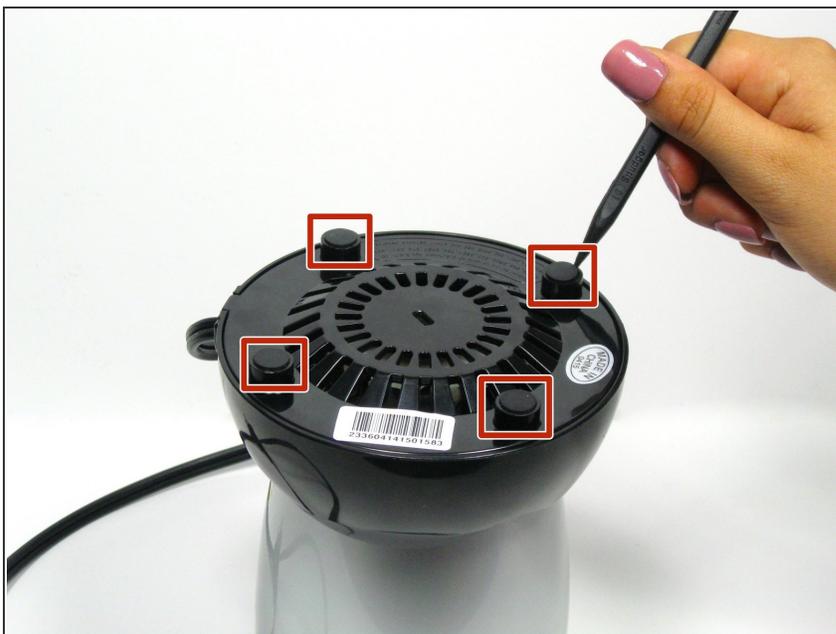

- Remove the four rubber pegs from the feet on the base of the Magic Bullet using the spudger.

Step 3

- Remove the four 14.0 mm Phillips head screws in the feet of the base of the Magic Bullet using the Phillips #1 screwdriver.

Step 4

- Remove the black base plate.

Step 5

- Remove the two 13.0 mm Phillips head screws from the white plastic cable guide using a Phillips #1 screwdriver.

Step 6
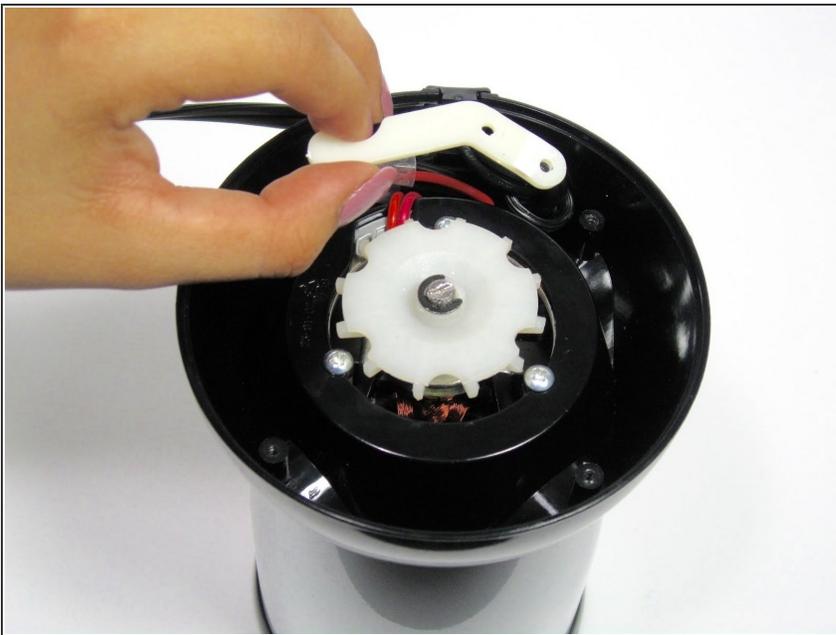

- Remove the white plastic cable guide.

Step 7
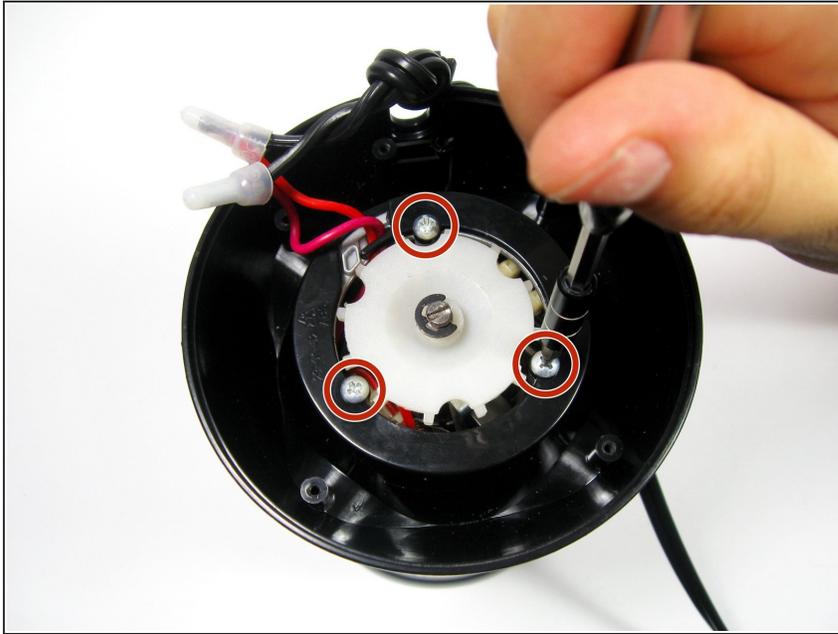

- Remove the three 11.0 mm Phillips head screws surrounding the white fan blade on the base using the Phillips #1 screwdriver.

Step 8

- Remove the black base.

Step 9
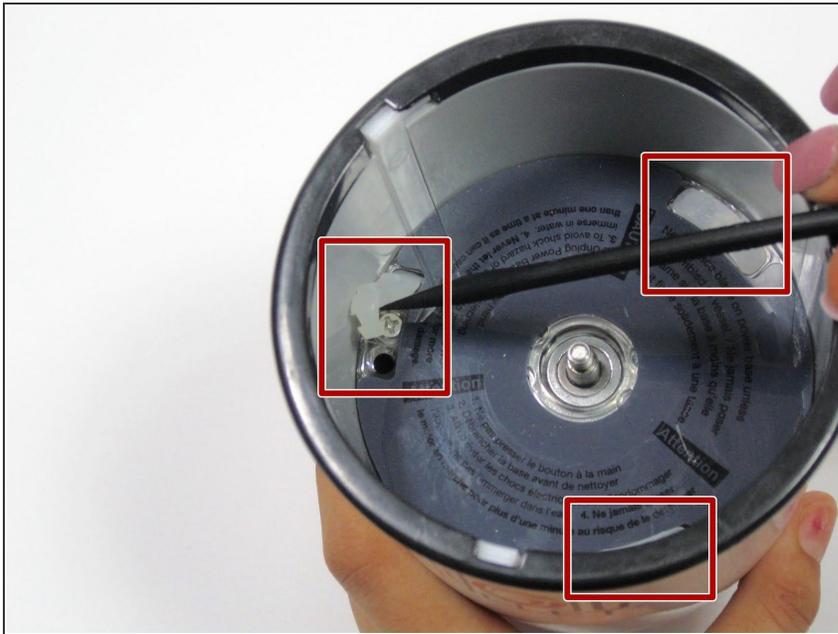

- Remove the three white rubber spacers with the spudger.

Step 10

- Remove the three 11.0 mm Phillips head screws using the Phillips #1 screwdriver.

Step 11

- Remove the motor.

To reassemble your device, follow these instructions in reverse order.
