

# Garmin Nuvi 2797LMT Battery Replacement

Replacing your battery will make your GPS run like it's new.

Written By: baileykaytar

## INTRODUCTION

This guide will help you replace your battery in a few short steps.

### TOOLS:

- [iFixit Opening Tools](#) (1)
- [T6 Torx Screwdriver](#) (1)

### PARTS:

- [Garmin Nuvi 2757/2797 and Dezl 760 Replacement Battery](#) (1)

## Step 1 — Battery

- ⓘ Before you begin make sure to turn off your GPS.
- Using your T-6 Torx Screwdriver, unscrew the ten 2.38 mm torx T-6 screws from the back of your GPS.

## Step 2

- Using the biggest plastic opening tool, pry open the GPS from the sides. You should now be able to see everything inside the GPS.

⚠ Be careful when opening the GPS because of the ribbon attached to the screen. It can tear easily.

### Step 3

- With the device open, locate the battery with its wire connector plugged into the motherboard. Now delicately detach the battery connector from the center by inserting a spudger underneath the power wire and lift up.

### Step 4

- Now using the small plastic opening tool, pry the battery up from the sides.
- ⓘ The battery has been attached with strong adhesive so you will need to use a little bit of force when prying it out.

To reassemble your device, follow these instructions in reverse order.
