Step 1 — Battery

- Turn the laptop upside down so that the top is sitting on a flat surface.

- If you are looking at the bottom of the laptop the battery is located on the front right side of the laptop; the opposite side from the floppy disk drive.

Step 2

- As shown by the arrow, slide the plastic cover up and then pull out and downwards.

- You should now be able to pull the battery out.

Step 3 — Keyboard

- Remove the four 16 mm screws bordering the edge of the laptop using a Phillips #0 screwdriver.

Step 4
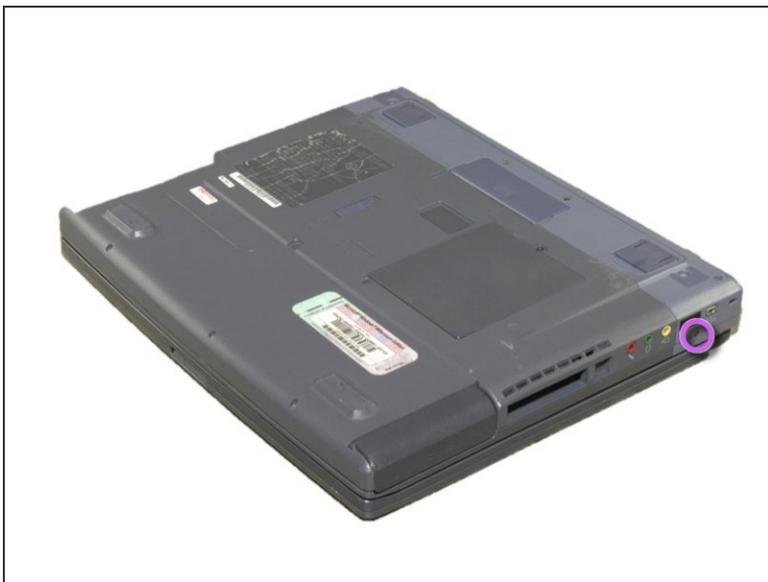

- Remove the 4mm screw on the right rear side of the laptop next to the audio ports using a Phillips #0 screwdriver.

- ⓘ This will release the speaker grille.

Step 5

- Flip the computer so the key board is facing up.

Step 6
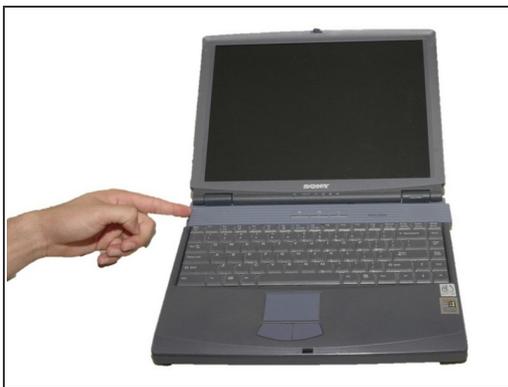

- Slide the blue speaker grille (located above the keyboard) to the right and gently pull upward. The grille will still be connected by a white electrical strip.

- Carefully pull out the white electrical strip. By doing this you will remove the speaker grille.

Step 7

- Remove the 4mm screw in the center using a Phillips screwdriver.

- Carefully and slowly pull the green strip straight up (away from the laptop) to disconnect it. Make sure not to pull too hard to avoid breaking.

- The keyboard can now be removed.

Step 8 — DVD Drive
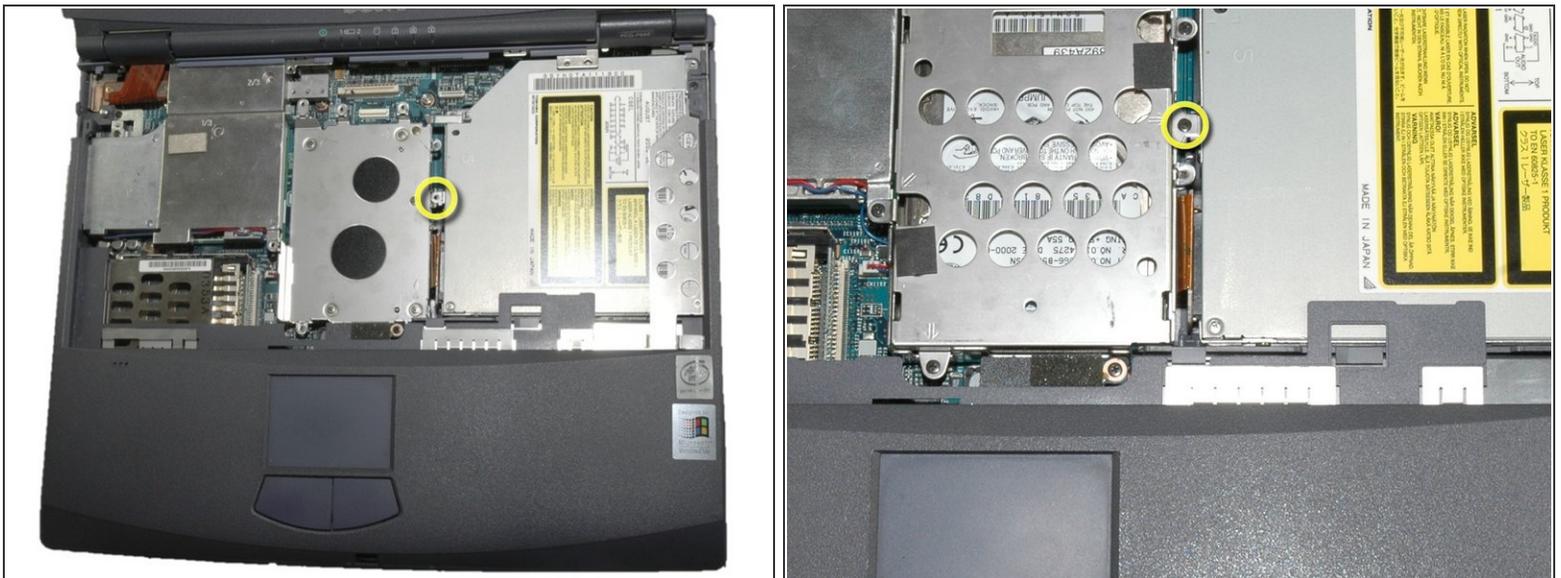

- Remove the 4mm Phillips screw that connects the hard drive cage to the DVD drive.

- Carefully remove the copper wire strip.

Step 9

- Slide the DVD drive out.

To reassemble your device, follow these instructions in reverse order.
