Step 1 — Plastic Case

- Remove the SIM card, that is located on top of the Jetpack.

Step 2

- With the device on its back and the label facing you, remove the rubber screw cover on the top left corner of the device.

- Under the rubber circle, remove the 1.25 mm screw using a [Phillips #00 Screwdriver](#).

- ⓘ You may need to peel back a piece of double sided tape covering the screw hole.

| |

## Step 3

- Remove three 1.25 mm screws.

Step 4

- Use a [plastic pick](#) at the seams and pry open the case.

Step 5

- Once the cover is off, this is what your device will look like.
Step 6 — Battery

- Once you have the case off of your device gently pull your battery away from the device.

- ⚠️ Do not attempt to completely remove the battery, as it is still attached to the motherboard by wires.

This document was generated on 2023-03-07 02:25:54 PM (MST).

Step 7

- With a pair of [Tweezers](#) remove the yellow tape covering the battery wires.

Step 8

- After removing the tape you may use the [Tweezers](#) to remove the wiring harness from the circuit board.

⚠ Do not squeeze the wires to hard you may damage them and cause a short.

Step 9

- You may now replace the battery in your Verizon Ellipsis Jetpack MHS800L.

To reassemble your device, follow these instructions in reverse order.
