# Pentax Optio WG-2 Menu Buttons Replacement

Use this guide to replace the buttons on the...

Written By: Matthew Bessette

INTRODUCTION

Use this guide to replace the buttons on the back of the camera that control the various menu options.

🔧 **TOOLS:**

Spudger (1)
Phillips #000 Screwdriver (1)
JIS Driver Set (1)
Tweezers (1)

Step 1 — Back Case

- Remove all four 1 mm JIS #00 screws from the back of the camera.

Step 2

- Use your finger to peel the grip off the top of the camera.

- For best results, start from the right side of the camera, opposite the buttons.

⚠ Once the grip is removed, you will most likely lose the water-tight seal.

Step 3

- Use the [tweezers](#) to remove the two buttons from the top of the camera.

ⓘ The buttons may fall out while removing the grip.

Step 4

- Remove the three 1 mm JIS #000 screws from the top.

- Remove the 1 mm JIS #000 screw from the bottom.

Step 5

- Carefully separate the back and the front of the camera.

⚠ There are three ribbon cables connecting the two boards. Be careful not to tear them.

Step 6

- Use the tip of a spudger to flip up the small retaining flaps on the ribbon cable ZIF connectors.

- Carefully pull the ribbon cables out of their sockets.

Step 7 — Menu Buttons

- Remove the eight JS#000 screws using a screwdriver and lift panel up.

- This screw does not need to be removed.

Step 8

- Once panel is removed the button 'sheet' can be removed.

To reassemble your device, follow these instructions in reverse order.
