

Side Panel Removal

How to remove the side panel on the HP Pavilion p6 desktop computer.

Written By: Oli

INTRODUCTION

How to remove the side panel on the HP Pavilion p6 desktop computer.

TOOLS:

- [Essential Electronics Toolkit](#) (1)
-

Step 1 — Side Panel Removal

- i Before you start make sure that all of the leads have been disconnected from the computer.
- ! It is strongly recommended to wait at least 15 minutes after turning it off to allow the computer and internal components to cool down.
- It is recommended to lay the computer down with the pull tab at the top to allow it to be easily opened.
- ☞ It is also worth mentioning at this point that for complete safety when working inside the computer that wearing an anti-static band and touching a grounded metal object before starting is good practice.

Step 2

- In order to remove the side panel a single screw needs to first be removed.
- i The side panel can then be pulled towards the back of the computer using the pull tab provided.
- i The panel then needs to be rotated as shown in order to remove it from the computer.
