Step 1 — Removing the HP Compaq dx2000MT Case Doors

- Turn off your computer and remove the power cable by pulling it straight out of its socket.

Step 2

- Remove the two Phillips #2 screws that secure the case door to the device.

Step 3

- Remove the side case door by pushing towards the rear of the device with your hand.
 - ⓘ This may take considerable force so keep pushing!
- Once you slide the door back, remove it by pulling it outwards from the device.

Step 4

- Remove the side case door by pushing towards the rear of the device with your hand.
 - ⓘ Once again, this may take considerable force.
- Once you slide the door back, remove it by pulling it outwards from the device.

Step 5 — Case Fan

- Remove the 3 prong power connector from the motherboard by pulling it outwards toward the side of the device.

Step 6

- Remove the 4 push fasteners from the case by:
 - Prying them outwards with a small flathead screwdriver and
 - Pulling them out with tweezers or pliers.

Step 7

- Remove the fan from the case by pulling it towards the front of the device.

To reassemble your device, follow these instructions in reverse order.
