Step 1 — Back Panel

- Turn the Neo3DO face down so that the logo is facing toward you.

- Insert the plastic opening tool between the metal frame and the plastic back panel, as shown.

Step 2

- Gently pry the back panel upwards.

⚠️ Ensure the tool does not slip into the device and damage the internals.

This document was generated on 2020-11-22 12:59:28 AM (MST).
Step 3

- Once the back panel has been pried away from the bottom and sides of the Neo3DO, lift the back panel up and away from the tablet.
Step 4

- When replacing the back panel, place the top edge of the back panel against the top edge of the Neo3DO, as shown.

- (i) The top edge of the device is the edge closest to the camera. The top of the back panel is the side with the hole for the camera.
Step 5 — Wire

- Starting with an open back panel, take your tweezers and use them to pull back the black tabs on the connector.
Step 6

- Pull the wire completely from the socket.

- (i) Check the metallic parts for signs of damage or corrosion. If either exists, you might need to replace the battery entirely.

This document was generated on 2020-11-22 12:59:28 AM (MST).

Step 7

- Re-insert the wire into the socket.

Step 8

- Using the tweezers, push the black tabs back in.

To reassemble your device, follow these instructions in reverse order.
