

Sony Vaio VGN-TXN25N RAM Replacement

Written By: Derek Nollsch

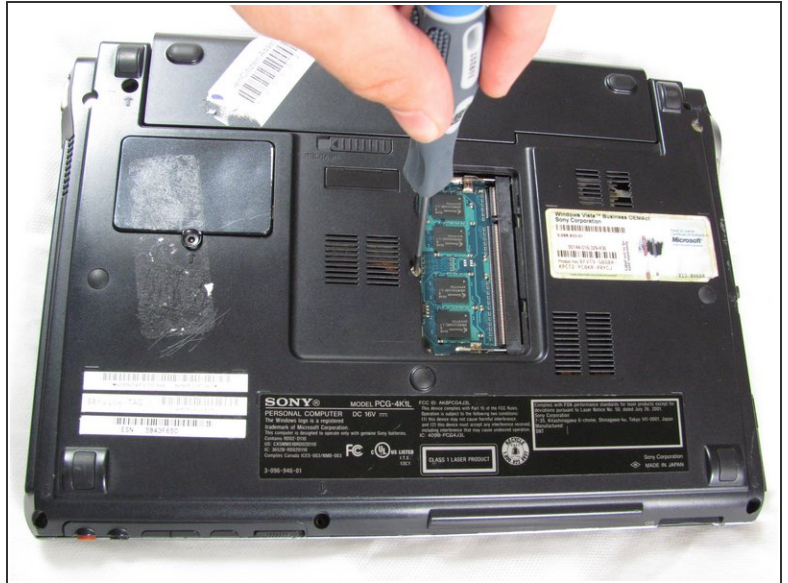

**TOOLS:**

- [Phillips #00 Screwdriver](#) (1)

**PARTS:**

- [PC2-4200 512 MB RAM Chip](#) (1)

Step 1 — RAM

- Locate the indicated cover on the back of the laptop (cover not shown in picture)
- Unscrew the small screw shown using a #00 Phillips Head Screwdriver, and remove the cover.

Step 2

- Remove the installed RAM by grabbing the end and forcefully removing from the slot shown (RAM not shown in picture)
- Insert new PC2-4200 RAM making sure to line up notch and inserting RAM until you hear an audible 'click'

To reassemble your device, follow these instructions in reverse order.
