

Zagg case repair

This shows a fix for a broken hing assembly for a Zagg keyboard case.

Written By: Dan Dunham

TOOLS:

- [Hack saw](#) (1)
-

Step 1 — Zagg case repair

- take a look at this video and you will see an easy fix for a broken Zagg keyboard case hing.

Step 2

- You will need the following. aluminum channel, slow setting glue, hack saw, sand paper, powered sanding device like a belt sander.

you might choose to finish the aluminum channel with a nicer finish but I went with just a brushed finish that is getting nicked up .
