

HP Envy x360 m6-aq103dx CPU Fan Replacement

How to replace the CPU fan in the HP Envy x360 m6-aq103dx

Written By: Jordan Eremeyeff

INTRODUCTION

Is the CPU fan in your HP Envy x360 m6-aq103dx not functioning correctly? Follow this easy replacement guide to open up your computer and replace the CPU fan.

TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)
- [Anti-Static Wrist Strap](#) (1)

PARTS:

- [HP Envy 15 and Envy M6 CPU Fan](#) (1)

Step 1 — Bottom Cover

- Flip the laptop over to expose the underside.
 - Remove the two grip pads with blue plastic opening tool by inserting the tool between the laptop and the pads and slowly lifting up.
- i** The grip pads are tacky, remove slowly to avoid separating the adhesive.

Step 2

- Remove the two 8 mm Phillips Head screws that were under the grip pads using a Phillip's Head 1 Screwdriver.

Step 3

- Remove the six 5 mm Torx screws using a T5 Torx Screwdriver.

Step 4

- Use the nylon spudger to pop off the bottom cover by inserting it into the heat vent and twisting to the left or right.

i You may hear a slight clicking or popping, but that is normal.

Step 5 — CPU Fan

- ⓘ Put on the anti-static wristband first
- Disconnect the port of the fan by flipping the black tab with the small blue plastic opening tool.
- Remove the cable from the connector.

Step 6

- Peel back a little bit of the grey tape connected to the round cable with the big blue opening tool.
- Using your fingers, peel the tape off of the body of the computer.
- ⓘ Peel slowly to avoid separating the adhesive.

Step 7

- Remove the black cable from the fan by unclicking it from the plastic body of the fan with your fingers and move it out of the area.

i There will be clicking sounds when the black cable is removed.

Step 8

- Disconnect the port with the red yellow and blue wires by dislodging the wires with your fingers.

Step 9

- Remove the two 4.5mm Phillips #1 screws.

Step 10

- Loosen the four black screws by the curved heat sink with a Phillips head 1 screwdriver.
- ⓘ These screws do not come off.

Step 11

- Lift the CPU fan out with your hand.

To reassemble your device, follow these instructions in reverse order.
