

Samsung Chromebook series 5 XE550C22 SSD Replacement

Replace or upgrade your SSD for your Samsung Chromebook XE550C22

Written By: Abel Osorio

INTRODUCTION

This guide will help you remove a bad SSD. The SSD is the main location that your Chromebook stores all important information such as the operating system.

TOOLS:

- [Metal Spudger](#) (1)
 - [JIS #0 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Back Panel

⚠ Turn the power off before beginning this step.

- Using the spudger, remove the four 1/2 inch skid pads from the back of the laptop.

Step 2

- Remove the eight 7mm screws using the J0 Screwdriver.

Step 3

- Starting at the center front of the laptop, insert the metal spudger between the keyboard panel and the bottom panel, separating the bottom panel from the laptop.
- Continue prying around the sides to release more brackets.

Step 4

- After disconnecting all the brackets, pull the back panel away from the laptop.
- ⓘ Note: The back panel has some flex to it, don't be afraid to use some force.

Step 5 — Battery

- Remove the four 3mm screws holding the battery with the J0 screwdriver.

Step 6

- Lift the battery up at an angle to disconnect the battery from the motherboard, then pull it away from the laptop.

⚠ Do not lift the battery straight up. This will damage the battery's connectors.

Step 7 — SSD

- Locate the SSD in the center of the Chromebook.

Step 8

- Remove the single 3.5mm screw using the J0 screwdriver.
- ⓘ The SSD should "pop-up" on its own after it's unscrewed.

Step 9

- Pull the SSD up and away from the Chromebook

To reassemble your device, follow these instructions in reverse order.
