# Toshiba Satellite P50W-C Wifi Module Replacement

This guide will show how to replace the wifi module in the Toshiba Satellite P50W-C

Written By: Sarah Fordjour

INTRODUCTION

The wifi module connects the device to wireless internet networks. Be careful when handling the wifi module.

🔧 TOOLS:

- JIS #1 (1)
- Heavy-Duty Spudger (1)
- Tweezers (1)

Step 1 — Back Cover

⚠ Turn the laptop off, unplug the AC adapter, and any other auxiliary components.

● Turn over the laptop and proceed to take out the seven 5mm silver JIS #1 head screws. If some of the screws are difficult to take out use the tweezers to help.
Step 2

● Use the screwdriver to take out the three 5mm black JIS #1 head screws that are located on the hinge.

Step 3

- Use the spudger to pry under the back cover until it pops off.
Step 4 — Wifi Module

- Locate the Wi-Fi module in the device which is located next to the ram.

Step 5

- Unscrew the 3mm JIS head screw with J1#1. This screw is holding the Wi-Fi module to the device

Step 6

- Remove the black and white wires that are connected to the device by gently pulling on it.

To reassemble your device, follow these instructions in reverse order.
